## TWO-THIRDS RULE IS RETAINED

Committee Votes Overwhelmingly Against Abrogation.

## SECOND SESSION UNDER WAY

Keynote Address of Temporary Chairman Harrison Features the First Session of Democratic National Convention—Resolution Lamenting Death of Woodrow Wilson Unanimously Adopted.

New York, June 25.—The two-thirds rule governing the nomination of candidates for president and vice president was approved by the rules committee of the Democratic national convention by an overwhelming vote.

Only three votes were cast against retention of the rule. They were cast by delegates from Texas, Florida and Tennessee.

The rules committee reported the following business procedure of the convention: Report of the credentials committee; report of the committee on permanent organization; ratification of members of the new Democratic national committee; presentation of names of candidates for president; report of platform committee, and action on report; balloting for presidential candidates; presentation of names of candidates for vice president; and balloting for vice president; presentation of miscellaneous motions and resolutions.

At the suggestion of members, who expressed the fear that the convention will be a long one, the committee recommended that all speeches in general debate be limited to 30 minutes and that all seconding speeches be limited to five minutes.

The convention adopted a resolution lamenting the death of Woodrow Wilson, whose leadership and achievements constitute an epoch in the world's history. The resolution added: "Wilson's administration, so notable for its accomplishments in the realm of real statesmanship, will forever remain a source of pride to future generations. American democracy is honored and American citizenship adorned by the character, faith and idealism of this great man. We are glad to exalt his record and to take inspiration from the things he said and did."

Mayor Hylan of New York addressed the convention, saying "the cry of the majority is for more personal liberty and less oppression." He continued: "The Democratic party can not afford to have it said that Wall Street dictated the nomination of this convention. If the odor of Wall Street clings to his garments, then the party is walking with open eyes to destruction."

### Harrison's Speech.

The keynote speech of Senator Pat Harrison of Mississippi, as temporary chairman of the convention, was the feature of the opening session. He held that the foremost issue of the day was the establishment of clean government. Harrison added: "There is a saturnalia of corruption now. Fall goes unmoored on his ranch in New Mexico; Daugherty sat with presidential approval at Cleveland and Daugherty's attorney was chairman of the committee created to oil the steam roller of the worst boss-ridden convention of a generation. Crooked business needs only to gesture or special privilege to wink to make this administration understand and do. It is against this brutal thing that we will wage relentless war in this campaign."

Other points in Harrison's speech follow:

"The Mellon tax bill was grown in the patch of special privilege. Through the Democratic law every taxpayer will get a 25 per cent reduction this year."

"The Republican tariff law reeked with special favors. Every line in it added to the living costs of the American consumer."

"The Harding-Coolidge administration was willing to give millions to the shipping trust, but not one cent to the American soldier."

"The least the American people expect from their public servants is common honesty. Pizzaro and his adventurous band were not more inspired for treasure than this administration."

"Let them decry the oil investigation, but the American people know and prefer the patriotic and cleansing work of Thomas J. Walsh to the foul infamy and thievery of Albert B. Fall."

"Hanna, Quay and Penrose are dead, but their spirits go marching on in the personages of the Three Musketeers of present-day Republic."

## ATLEE POMERENE

Ohio Member of the Convention's Committee on Rules.

Atlee Pomerene, Ohio Member of the Convention's Committee on Rules.

"Coolidge has quibbled in every issue, and in every fight he has floundered."

"The Democratic party will readjust tariff rates and reduce transportation charges. We will rigidly enforce law, whether the violator be a bloated trust magnate, a congressional bribe-taker or an embezzler of the public domain, or a disreputable bootlegger. We will resume in manly fashion our responsibilities to the world. We will go to the relief of distressed agriculture."

## ON THE DIAMOND

Newport, Ky., June 25.—Fifteen minutes after he is alleged to have held up a grocery store, robbing the cash register of \$21.50 and dashing for liberty, Ora C. Penney, 36, of Portsmouth, O., was in jail here. Penney said he had been driven to desperation by "playing the races at Latonia."

## PLANKS URGED BY WESTERNERS

Farm Relief and Tax Reduction Held Winning Issues.

## SUGGEST TARIFF ADJUSTMENT

Klan Issue and Plank Urging American Participation in League of Nations Will Be Fought Out in the Convention's Resolutions Committee—Newton Baker Crusading for League and Anti-Klan Planks.

New York, June 25.—Democratic leaders from the west are putting forward tax reduction, adjustment of the tariff so as to lower the cost of living and practical farm relief as "winning issues."

These men, including Thomas Taggart of Indiana, say they believe the party should get back to fundamental economic issues—the things that touch the pocket nerve of the voters. They fear the Klan issue has already been overplayed and will result in injury to Democratic chances in November.

While E. H. Moore of Ohio and George Brennan of Illinois have entered a last ditch fight for an anti-Klan plank naming the organization, neither they nor Senator Underwood, Alabama, will say that they will carry the fight to the floor of the convention. This leads to the belief that the issue will be fought out in the resolutions committee and the strong anti-Klan faction will content themselves with bringing in a minority report if the plank does not satisfy them.

Chairman Cordell Hull of the national committee made public a letter from Colonel E. M. House, urging the adoption of a plank in the platform pledging the Democratic party to advocate the United States joining the league as an associate member. Thus, House, who is now in Europe, pointed out the fears of entangling alliances would be dispelled.

Freight Rate Cut Urged.

The farm relief controversy was launched by a group of western governors, led by Charles W. Bryan of Nebraska, a brother of the "Commoner," William J. Bryan. The westerners tossed an insurgent program of farm relief planks into the platform cauldron, which was in direct conflict with the recommendations of an unofficial group of party leaders, who drafted a tentative program for submission of the convention.

The gubernatorial planks were featured by a demand for government operation of the coal and oil industries and government ownership of a super-water power system. They also included a request for a 30 per cent slash in freight rates on farm products and repeal of the Esch-Cummings act.

Newton D. Baker of Cleveland, custodian of the political last will and testament of Woodrow Wilson, will carry the burden of the battle for the two platform declarations which may cause a division of sentiment in the Democratic Party.

Baker will crusade for a league of nations plank and he will urge adoption of the proposed denunciation of the Ku Klux Klan as a menace to the perpetuity of American institution.

Baker came to New York to battle for an upstanding renewal of Democracy's faith in the principles laid down by the late President Wilson. When he got here he was instructed by the unanimous vote of the Ohio delegation to fight for the adoption either verbatim or in spirit the text of the Ed H. Moore plank assailing the Klan.

There was no hitch in the plans of leaders to make Homer S. Cummings of Connecticut chairman of the resolutions committee. He was unopposed for the place and his election was unanimous. He was placed in nomination by W. H. O'Brien of Indiana and the nomination was seconded by Newton D. Baker, whose name had been mentioned in some quarters in connection with the chairmanship. Senator Key Pittman of Nevada was made secretary. In placing his name before the committee, Senator Kendrick of Wyoming said the purpose was to show the country that Democratic senators were not in as "bad repute" in their party as are Republican senators.

## NEWTON D. BAKER

Leads Fight For Indorsement of League of Nations.

## DOINGS IN OHIO

Pardoned by Governor.

Columbus, June 25.—Governor Donahey issued two commutations of sentence and one pardon. The latter went to John Cleave of Stark county, convicted of perjury in 1921 and given a suspended sentence of five to 10 years. Henry Samuel of Columbus, negro, sentenced to life imprisonment for burglary of an inhabited dwelling, and George Melay of Stark county, sentenced to one to five years' imprisonment for illegal manufacture of liquor, were granted commutations, effective at once.

Recession of Industrial Activity.

Cleveland, June 25.—Coal consumption during May was approximately 25 per cent less than during the same month last year, according to a survey made by the fuel committee of the National Association of Purchasing Agents. Industrial activity receded 13 1/2 per cent. Industrial stocks of coal, reduced approximately 5,975,000 tons last month, are about as low as they are likely to go, the committee says.

Probing Dynamite Outrage.

Sidney, O., June 25.—Police and county officials began an investigation into the attempt to dynamite the \$4,500,000 bridge of the Big Four railroad here. Sidney and vicinity were shaken by the explosion. A fuse and dynamite were found in one of the arches. Discharged employees of the company constructing the bridge are blamed by police.

Woman Killed.

Dover, O., June 25.—Mrs. Mary Harper, 58, was killed near New Philadelphia when she leaped from an automobile driven by her son-in-law, Gus Hambeck. Mrs. Harper jumped from the car when the drive shaft of the car broke as Hambeck was driving down a hill. The car passed over her.

Infant Crushed to Death.

Fremont, O., June 25.—Robert Pettigill, 7-months-old son of Robert Pettigill of Lansing, Mich., died in his mother's arms here as the result of a collision between autos driven by Pettigill and Henry Gosenarten of Detroit.

Traffic Fatality.

Toledo, June 25.—J. C. Trumbull, 60, was injured fatally when he ran to catch a streetcar. The tongue of a wagon struck him and the front wheels of the vehicle crushed him. He died in a hospital.

Brakeman Loses Life.

Columbus, June 25.—Lou R. Sears, 37, brakeman, was killed when a Hooking Valley wreck train was struck by a freight train north of the city. He is survived by a widow and six children.

Boy Drowns.

Warren, O., June 25.—Emmett Leigh, 14, was drowned when a raft tipped, precipitating him into the Mahoning river. His parents moved to Mahoning county recently from Akron.

Shanghai China, June 25.—Many people have been drowned and property already damaged thousands of dollars by the most disastrous floods in the history of the Min river, according to advices here. The city of Su Chow, a treaty port and capital of the province of Fokien, is three-quarters under water. The entire warehouse district is submerged. "The rice crop is almost entirely ruined," a dispatch says, "and many tea plantations under water."

## BETTMAN SEES EXTRAVAGANCES

Attacks Donahey Administration in Keynote Speech.

## OUTLINES REPUBLICAN STAND

Temporary Chairman of State Convention Favors Budget System in Local Finance and Home Rule in Taxation—Candidates for Presidential Electors Indorsed—Proceedings of Republican Convention.

Columbus, June 25.—Attacks on the administration of Governor Donahey featured the opening session of the Republican state convention here.

Gilbert Bettman of Cincinnati, temporary chairman of the convention, led the assault against the governor. He charged that Donahey's record had been one of broken promises, extravagance, absence of constructive policies and disrespect for law. The governor promised economy, Bettman asserted, but under his administration salaries and administrative expenses have increased nearly a million dollars a year.

"The roads Donahey promised would be built for \$7,000 a mile have cost, under his regime, \$37,000 a mile," Bettman charged. He also asserted that Donahey pardoned more prisoners in nine months than were freed during the entire administration of former Governor Davis.

The temporary chairman declared that the party must turn its attention to relieving the financial condition of the cities. "Law" should be enacted establishing an adequate budget system for counties, schools, cities and townships. By such a system expenses would be limited and real economy secured. He also declared that a system should be devised by which a tax charter could be created in which the tax limitations could be adapted to the particular needs of each locality, thereby permitting cities to raise the revenues they need.

In conclusion Bettman urged that a plank be placed in the state platform advocating the pre-primary nominating convention as a means of remedying conditions which he charged have resulted from the present direct primary law.

District delegations, in caucus before the convention convened, nominated the following Republican presidential electors, whose selection will be confirmed by the convention:

First district, George Puchta, Cincinnati; Second, Fred E. Wesselman, Cincinnati; Third, J. W. Myers, Hamilton; Fourth, J. Ward Kyte, Piqua; Fifth, Davis Johnson, Wauseon; Sixth, A. T. Holcomb, Portsmouth; Seventh, Newton Fairbanks, Springfield; Eighth, Clarence Cessna, Kenton; Ninth, Mrs. Mary Lockie Hurin, Toledo; Tenth, John Finsterwald, Athens; Eleventh, John E. Davis, Shawnee; Twelfth, Walter B. Jones, Columbus; Thirteenth, John D. Mack, Sandusky; Fourteenth, V. W. Phila-trault, Ravenna; Fifteenth, Milton H. Turner, Cambridge; Sixteenth, W. T. Kuhn, Canton; Seventeenth, Thomas B. Barnes, Mansfield; Eighteenth, not yet selected; Nineteenth, J. D. Waddell, Niles; Twentieth, Sam B. Mitchell, Cleveland; Twenty-first, A. J. Mitchell, Cleveland; Twenty-second, Mrs. Elizabeth C. T. Miller, Cleveland.

The convention will select two electors-at-large.

## DAVIS EXPECTS TO WIN

Former Governor Discusses His Candidacy For the Renomination.

Columbus, June 25.—Former Governor Harry L. Davis, who is a candidate for the Republican gubernatorial nomination, declared here that he is satisfied with the outlook for his candidacy. He was here in attendance upon the Republican state convention.

"Most flattering assurances have come to me from every section of Ohio, promising support. These are so whole-hearted as to encourage me in my contest," Davis said. "One pleasing feature is the indorsement which has been given the reorganization bill, enacted during my administration. This has been found to be in harmony with the sentiment held by a great majority of the people. I not only expect to win at the primaries, but to be elected and restore the surplus left by the Republican administration and which is now being depleted and squandered."

THE WEATHER.  
Ohio—Thursday: Cloudy, cooler.

## BLAMES COX INFLUENCE

Durbin Discusses His Defeat For National Committeeman.

New York, June 25.—Defeat of State Chairman W. W. Durbin for national committeeman by Ed H. Moore of Youngstown has caused a breach in the Ohio delegation. Durbin in a statement charged that influence of Cox himself was responsible for his defeat. Durbin said: "My defeat as national committeeman was due to the Cox influence. The secret ballot, which in my opinion was engineered by the Cox managers in order to befriend Ed Moore, was responsible for a sufficient switch of votes to convert a reasonably sure victory into a defeat. We feel so reasonably certain that Cox's closest friends voted for Moore that I have no doubt that his influence was used. I am told also that Cox telephoned Henry Goeke of Lima that it would not do to defeat Moore, who is his floor leader. Delegates were told this story, too."

Durbin and his friends resent also the selection of Moore as floor leader by the Cox management without consulting with them.

## Accepts Military Control.

Berlin, June 25.—The German government notified the entente powers of its readiness to accept military control as outlined by the Dawes report. Germany urges, however, that it be so accomplished that all clashes be avoided.

## Council Sustains Ruling.

Cleveland, June 25.—A ruling made by Safety Director Edwin D. Barry several weeks ago, forbidding policemen and firemen from joining political, social or other organizations, was sustained by city council.

## TELLS OF RELATIONS WITH JESSE SMITH

Means Says He Received \$400,000 for the Ohioan.

New York, June 25.—Gaston L. Means told a jury trying him for conspiring to violate the liquor laws here that the late Jesse Smith of Washington C. H., O., committed suicide in Washington because he (Means) and his secretary, Elmer W. Jarnecke, refused to act as Smith's agents in the return of \$21,000 received for liquor withdrawal permits. This was at a time, Means testified, when Washington was full of rumors of possible indictments on liquor charges and when those for whom the permits were secured demanded the return of their money.

Means said he informed Smith he would go before the congressional committee investigating prohibition and tell "all he knew." The following morning, Means said, Smith was found dead.

Describing his relations with Smith, Means asserted that between 1921 and 1922 he received more than \$400,000 for Smith from mysterious messengers. One sum of \$100,000 was paid by a Japanese, the witness said.

## MARKET QUOTATIONS

CHICAGO, June 25.  
Cattle—Top steers, \$10.50; bulk of sales, \$7.50; 50; stockers and feeders, \$5.50; calves, \$9.10; 50.  
Hogs—Top, \$7.15; bulk of sales, \$6.25; 7.10; packing sows, \$6.15; 40; pigs, \$5.50; 75.  
Sheep and Lambs—Native lambs, \$13.00; ewes, \$2.00; 25.  
Receipts—Cattle, 8,000; hogs, 33,000; sheep and lambs, 16,000.

CLEVELAND, June 25.  
Cattle—Steers, \$5.50; 10; heifers, \$5.50; 50; cows, \$2.00; 25; bulls, \$4.00; 50; calves, \$5.00; 50.  
Hogs—Mixed, \$7.40; pigs and lights, \$6.50; 50; roughs, \$6.50; 50; stags, \$4.50.  
Sheep and Lambs—Lambs, \$8.15; 15; sheep, \$2.00.  
Receipts—Cattle, 300; hogs, 2,000; sheep and lambs, 500.

PITTSBURGH, June 25.  
Cattle—Steers, \$10.00; 25; heifers, \$7.75; 50; cows, \$5.50; 50; calves, top, \$10.00; 50; heavy, \$7.50; 50; light, \$6.50; 50; pigs, \$5.00; 50; sheep and lambs—Lambs, \$8.15; 15; sheep, \$2.00.  
Receipts—Cattle, 1,500; sheep and lambs, 200.

CINCINNATI 21, June 25.  
Cattle—Steers, \$4.50; 50; heifers, \$4.50; 50; cows, \$2.50; 50; calves, \$4.50; 50; pigs—Heavy and packers and butchers, \$7.50; 50; mediums, \$6.50; 50; light, \$5.50; 50; pigs, \$4.50; 50.  
Sheep and Lambs—Lambs, \$8.15; 15; sheep, \$2.00.

BALTIMORE, June 25.  
Butter—Fancy creamery, 42 1/2¢; 44¢; rolls, \$8.30; 30¢; store packed, 35¢; eggs—The firsts, 26 1/2¢.  
Live poultry—Young chickens, 30¢; 45¢; old hens, 21¢; 27¢; old roosters, 15¢.

TOLEDO, June 25.  
Wheat, \$1.17 1/2; 1 1/2; corn, 94 1/2¢; 96¢; soybeans, \$1.15; 1 1/2; cloverseed, \$11.80.

## TWO-THIRDS RULE IS RETAINED

Committee Votes Overwhelmingly Against Abrogation.

### SECOND SESSION UNDER WAY

Keynote Address of Temporary Chairman Harrison Features the First Session of Democratic National Convention—Resolution Lamenting Death of Woodrow Wilson Unanimously Adopted.

New York, June 25.—The two-thirds rule governing the nomination of candidates for president and vice president was approved by the rules committee of the Democratic national convention by an overwhelming vote.

Only three votes were cast against retention of the rule. They were cast by delegates from Texas, Florida and Tennessee.

The rules committee reported the following business procedure of the convention: Report of the credentials committee; report of the committee on permanent organization; ratification of members of the new Democratic national committee; presentation of names of candidates for president; report of platform committee, and action on report; balloting for presidential candidates; presentation of names of candidates for vice president, and balloting for vice president; presentation of miscellaneous motions and resolutions.

At the suggestion of members, who expressed the fear that the convention will be a long one, the committee recommended that all speeches in general debate be limited to 30 minutes and that all seconding speeches be limited to five minutes.

The convention adopted a resolution lamenting the death of Woodrow Wilson, whose "leadership and achievements constitute an epoch in the world's history." The resolution added: "Wilson's administration, so notable for its accomplishments in the realm of real statesmanship, will forever remain a source of pride to future generations. American democracy is honored and American citizenship adorned by the character, faith and idealism of this great man. We are glad to exalt his record and to take inspiration from the things he said and did."

Mayor Hylan of New York addressed the convention, saying "the cry of the majority is for more personal liberty and less oppression." He continued: "The Democratic party can not afford to have it said that Wall Street dictated the nomination of this convention. If the odor of Wall Street clings to his garments, then the party is walking with open eyes to destruction."

#### Harrison's Speech.

The keynote speech of Senator Pat Harrison of Mississippi, as temporary chairman of the convention, was the feature of the opening session. He held that the foremost issue of the day was the establishment of clean government. Harrison added: "There is a saturnalia of corruption now. Fall goes unmolested on his ranch in New Mexico; Daugherty eat with presidential approval at Cleveland and Daugherty's attorney was chairman of the committee created to oil the steam roller of the worst boss-ridden convention of a generation. Crooked business needs only to gesture or special privilege to wink to make this administration understand and do. It is against this brutal thing that we will wage relentless war in this campaign."

Other points in Harrison's speech follow:

"The Mellon tax bill was grown in the patch of special privilege. Through the Democratic law every taxpayer will get a 25 per cent reduction this year."

"The Republican tariff law reeked with special favors. Every line in it added to the living costs of the American consumer."

"The Harding-Coolidge administration was willing to give millions to the shipping trust, but not one cent to the American soldier."

"The least the American people expect from their public servants is common honesty. Pizarro and his adventurous band were not more inured to treachery than this administration."

"Let them decry the oil investigation, but the American people know and prefer the patriotic and cleansing work of Thomas J. Walsh to the foul infamy and thievery of Albert B. Fall."

"Hanna, Quay and Penrose are dead, but their spirits go marching on in the personages of the Three Musketeers of present-day Republic."

### ATLEE POMERENE

Ohio Member of the Convention's Committee on Rules.

canism—Butler, Stearns and Slomp. "Coolidge has quibbled in every issue, and in every fight he has floundered."

"The Democratic party will readjust tariff rates and reduce transportation charges. We will rigidly enforce law, whether the violator be a bloated trust magnate, a congressional bribe-taker or an embezzler of the public domain, or a disreputable bootlegger. We will assume in manly fashion our responsibilities to the world. We will go to the relief of distressed agriculture."

#### Alleged Robber Seized.

Newport, Ky., June 25.—Fifteen minutes after he is alleged to have held up a grocery store, robbing the cash register of \$21.50 and dashing for liberty, Ora C. Penney, 36, of Portsmouth, O., was in jail here. Penney said he had been driven to desperation by "playing the races at Latonia."

## PLANKS URGED BY WESTERNERS

Farm Relief and Tax Reduction Held Winning Issues.

### SUGGEST TARIFF ADJUSTMENT

Klan Issue and Plank Urging American Participation in League of Nations Will Be Fought Out in the Convention's Resolutions Committee—Newton Baker Crusading for League and Anti-Klan Planks.

New York, June 25.—Democratic leaders from the west are putting forward tax reduction, adjustment of the tariff so as to lower the cost of living and practical farm relief as "winning issues."

These men, including Thomas Taggart of Indiana, say they believe the party should get back to fundamental economic issues—the things that touch the pocket nerve of the voters. They fear the Klan issue has already been overplayed and will result in injury to Democratic chances in November.

While E. H. Moore of Ohio and George Brennan of Illinois have entered a last ditch fight for an anti-Klan plank naming the organization, neither they nor Senator Underwood, Alabama, will say that they will carry the fight to the floor of the convention. This leads to the belief that the issue will be fought out in the resolutions committee and the strong anti-Klan faction will content themselves with bringing in a minority report if the plank does not satisfy them.

Chairman Cordell Hull of the national committee made public a letter from Colonel E. M. House, urging the adoption of a plank in the platform pledging the Democratic party to advocate the United States joining the league as an associate member. Thus, House, who is now in Europe, pointed out the fears of entangling alliances would be dispelled.

#### Freight Rate Cut Urged.

The farm relief controversy was launched by a group of western governors, led by Charles W. Bryan of Nebraska, a brother of the "Commoner," William J. Bryan. The westerners tossed an insurgent program of farm relief planks into the platform cauldron, which was in direct conflict with the recommendations of an unofficial group of party leaders, who drafted a tentative program for submission of the convention.

The gubernatorial planks were featured by a demand for government operation of the coal and oil industries and government ownership of a super-water power system. They also included a request for a 30 per cent slash in freight rates on farm products and repeal of the Esch-Cummins act.

Newton D. Baker of Cleveland, custodian of the political last will and testament of Woodrow Wilson, will carry the burden of the battle for the two platform declarations which may cause a division of sentiment in the Democratic Party.

Baker will crusade for a league of nations plank and he will urge adoption of the proposed denunciation of the Ku Klux Klan as a menace to the perpetuity of American institution.

Baker came to New York to battle for an upstanding renewal of Democracy's faith in the principles laid down by the late President Wilson. When he got here he was instructed by the unanimous vote of the Ohio delegation to fight for the adoption either verbatim or in spirit the text of the Ed H. Moore plank assailing the Klan.

There was no hitch in the plans of leaders to make Homer S. Cummings of Connecticut chairman of the resolutions committee. He was unopposed for the place and his election was unanimous. He was placed in nomination by W. H. O'Brien of Indiana and the nomination was seconded by Newton D. Baker, whose name had been mentioned in some quarters in connection with the chairmanship. Senator Key Pittman of Nevada was made secretary. In placing his name before the committee, Senator Kendrick of Wyoming said the purpose was to show the country that Democratic senators were not in as "bad repute" in their party as are Republican senators.

New Brotherhood Chief.

Cleveland, June 25.—L. G. Griffing, Long Island, N. Y., was elected grand chief of the Brotherhood of Locomotive Engineers. Only one ballot was taken. Griffing was formerly a vice president of the brotherhood.

### NEWTON D. BAKER

Leads Fight For Indorsement of League of Nations.

### DOINGS IN OHIO

#### Pardoned by Governor.

Columbus, June 25.—Governor Donahy issued two commutations of sentence and one pardon. The latter went to John Ciesea of Stark county, convicted of perjury in 1921 and given a suspended sentence of five to 10 years. Henry Samuel of Columbus, negro, sentenced to life imprisonment for burglary of an inhabited dwelling, and George Melay of Stark county, sentenced to one to five years' imprisonment for illegal manufacture of liquor, were granted commutations, effective at once.

#### Recession of Industrial Activity.

Cleveland, June 25.—Coal consumption during May was approximately 25 per cent less than during the same month last year, according to a survey made by the fuel committee of the National Association of Purchasing Agents. Industrial activity receded 13 1/2 per cent. Industrial stocks of coal, reduced approximately 5,975,000 tons last month, are about as low as they are likely to go, the committee says.

#### Probing Dynamite Outrage.

Sidney, O., June 25.—Police and county officials began an investigation into the attempt to dynamite the \$4,500,000 bridge of the Big Four railroad here. Sidney and vicinity were shaken by the explosion. A fuse and dynamite were found in one of the arches. Discharged employees of the company constructing the bridge are blamed by police.

#### Woman Killed.

Dover, O., June 25.—Mrs. Mary Harper, 58, was killed near New Philadelphia when she leaped from an automobile driven by her son-in-law, Gus Hambeck. Mrs. Harper jumped from the car when the drive shaft of the car broke as Hambeck was driving down a hill. The car passed over her.

#### Infant Crushed to Death.

Fremont, O., June 25.—Robert Pettigill, 7-months-old son of Robert Pettigill of Lansing Mich., died in his mother's arms here as the result of a collision between autos driven by Pettigill and Henry Gosengarten of Detroit.

#### Traffic Fatality.

Toledo, June 25.—J. C. Trumbull, 60, was injured fatally when he ran to catch a streetcar. The tongue of a wagon struck him and the front wheels of the vehicle crushed him. He died in a hospital.

#### Brakeman Loses Life.

Columbus, June 25.—Lou R. Sears, 37, brakeman, was killed when a Hocking Valley wreck train was struck by a freight train north of the city. He is survived by a widow and six children.

#### Boy Drowns.

Warren, O., June 25.—Emmett Leith, 14, was drowned when a raft tipped, precipitating him into the Mahoning river. His parents moved to Mahoning county recently from Akron.

Shanghai, China, June 25.—Many people have been drowned and property already damaged thousands of dollars by the most disastrous floods in the history of the Min river, according to advices here. The city of Ph Chow, a treaty port and capital of the province of Fokien, is three-quarters under water. The entire warehouse district is submerged. "The rice crop is almost entirely ruined," a dispatch says, "and many tea plantations under water."

## BETTMAN SEES EXTRAVAGANCES

Attacks Donahy Administration in Keynote Speech.

### OUTLINES REPUBLICAN STAND

Temporary Chairman of State Convention Favors Budget System in Local Finance and Home Rule in Taxation—Candidates for Presidential Electors Indorsed—Proceedings of Republican Convention.

Columbus, June 25.—Attacks on the administration of Governor Donahy featured the opening session of the Republican state convention here.

Gilbert Bettman of Cincinnati, temporary chairman of the convention, led the assault against the governor. He charged that Donahy's record had been one of broken promises, extravagance, absence of constructive policies and disrespect for law. The governor promised economy, Bettman asserted, but under his administration salaries and administrative expenses have increased nearly a million dollars a year.

"The roads Donahy promised would be built for \$1,000 a mile have cost, under his regime, \$37,000 a mile," Bettman charged. He also asserted that Donahy pardoned more prisoners in nine months than were freed during the entire administration of former Governor Davis.

The temporary chairman declared that the party must turn its attention to relieving the financial condition of the cities. "Laws should be enacted establishing an adequate budget system for counties, schools, cities and townships. By such a system expenses would be limited and real economy secured." He also declared that a system should be devised by which a tax charter could be created in which the tax limitations could be adapted to the particular needs of each locality, thereby permitting cities to raise the revenues they need.

In conclusion Bettman urged that a plank be placed in the state platform advocating the pre-primary nominating convention as a means of remedying conditions which he charged have resulted from the present direct primary law.

District delegations, in caucus before the convention convened, nominated the following Republican presidential electors, whose selection will be confirmed by the convention:

First district, George Puchta, Cincinnati; Second, Fred E. Wesselman, Cincinnati; Third, J. W. Myers, Hamilton; Fourth, J. Ward Kyrle, Piqua; Fifth, Davis Johnson, Wauseon; Sixth, A. T. Holcomb, Portsmouth; Seventh, Newton Fairbanks, Springfield; Eighth, Clarence Cessna, Kenton; Ninth, Mrs. Mary Locké Hurin, Toledo; Tenth, John Finsterwald, Athens; Eleventh, John E. Davis, Shawnee; Twelfth, Walter B. Jones, Columbus; Thirteenth, John D. Mack, Sanudusky; Fourteenth, V. W. Filhae-trault, Ravenna; Fifteenth, Milton H. Turner, Cambridge; Sixteenth, W. T. Kuhn, Canton; Seventeenth, Thomas B. Barnes, Mansfield; Eighteenth, not yet selected; Nineteenth, J. D. Wadell, Niles; Twentieth, Sam B. Mitchell, Cleveland; Twenty-first, A. J. Mitchell, Cleveland; Twenty-second, Mrs. Elizabeth C. T. Miller, Cleveland.

The convention will select two electors-at-large.

### DAVIS EXPECTS TO WIN

Former Governor Discusses His Candidacy For the Renomination.

Columbus, June 25.—Former Governor Harry L. Davis, who is a candidate for the Republican gubernatorial nomination, declared here that he is satisfied with the outlook for his candidacy. He was here in attendance upon the Republican state convention.

"Most flattering assurances have come to me from every section of Ohio, promising support. These are so whole-hearted as to encourage me in my contest," Davis said. "One pleasing feature is the indorsement which has been given the reorganization bill, enacted during my administration. This has been found to be in harmony with the sentiment held by a great majority of the people. I not only expect to win at the primaries, but to be elected and restore the surplus left by the Republican administration and which is now being depleted and squandered."

THE WEATHER.  
Ohio—Thursday: Cloudy, cooler.

### BLAMES COX INFLUENCE

Durbin Discusses His Defeat For National Committeeman.

New York, June 25.—Defeat of State Chairman W. W. Durbin for national committeeman by Ed H. Moore of Youngstown has caused a breach in the Ohio delegation. Durbin in a statement charged that influence of Cox himself was responsible for his defeat. Durbin said: "My defeat as national committeeman was due to the Cox influence. The secret ballot, which in my opinion was engineered by the Cox managers in order to befriend Ed Moore, was responsible for a sufficient switch of votes to convert a reasonably sure victory into a defeat. We feel so reasonably certain that Cox's closest friends voted for Moore that I have no doubt that his influence was used. I am told also that Cox telephoned Henry Goeke of Lima that it would not do to defeat Moore, who is his floor leader. Delegates were told this story, too."

Durbin and his friends resent also the selection of Moore as floor leader by the Cox management without consulting with them.

#### Accepts Military Control.

Berlin, June 25.—The German government notified the entente powers of its readiness to accept military control as outlined by the Dawes report. Germany urges, however, that it be so accomplished that all clashes be avoided.

#### Council Sustains Ruling.

Cleveland, June 25.—A ruling made by Safety Director Edwin D. Barry several weeks ago, forbidding policemen and firemen from joining political, social or other organizations, was sustained by city council.

## TELLS OF RELATIONS WITH JESSE SMITH

Means Says He Received \$400,000 for the Ohioan.

New York, June 25.—Gaston J. Means told a jury trying him for conspiring to violate the liquor laws here that the late Jesse Smith of Washington C. H., O., committed suicide in Washington because he (Means) and his secretary, Elmer W. Jarnecke, refused to act as Smith's agents in the return of \$21,000 received for liquor withdrawal permits. This was at a time, Means testified, when Washington was full of rumors of possible indictments on liquor charges and when those for whom the permits were secured demanded the return of their money.

Means said he informed Smith he would go before the congressional committee investigating prohibition and tell "all he knew." The following morning, Means said, Smith was found dead.

Describing his relations with Smith, Means asserted that between 1921 and 1922 he received more than \$400,000 for Smith from mysterious messengers. One sum of \$100,000 was paid by a Japanese, the witness said.

### MARKET QUOTATIONS

CHICAGO, June 25.  
Cattle—Top steers, \$10.50; bulk of sales, \$7.50; 50; stockers and feeders, \$5.50; calves, \$9.10 to \$10.50.  
Hogs—Top, \$7.15; bulk of sales, \$6.25; 7.10; packing sows, \$6.15; 40; pigs, \$5.50 to \$7.50.  
Sheep and Lambs—Native lambs, \$13.00; ewes, \$2.95 to \$5.25.  
Receipts—Cattle, 8,000; hogs, 33,000; sheep and lambs, 16,000.

CLEVELAND, June 25.  
Cattle—Steers, \$5.50 to \$10; heifers, \$5.50; 50; cows, \$2.50 to \$6; bulls, \$4.50 to \$6; calves, \$5.50 to \$10.  
Hogs—Mixed, \$7.40; pigs and lights, \$5.50; roughs, \$5; stags, \$4.50.  
Sheep and Lambs—Lambs, \$8 to \$15; sheep, \$2 to \$7.  
Receipts—Cattle, 300; hogs, 2,000; sheep and lambs, 500.

PITTSBURGH, June 25.  
Cattle—Steers, \$10 to \$10.25; heifers, \$7.75; 50; cows, \$5.50 to \$6.25; calves, top, \$10.  
Hogs—Heavy, \$7.50 to \$7.65; heavy yorkers, \$7.60 to \$7.65; light yorkers and pigs, \$6.75 to \$7.  
Sheep and Lambs—Top sheep, \$7; top lambs, \$10.  
Receipts—Hogs, 1,500; sheep and lambs, 200.

CINCINNATI, June 25.  
Cattle—Steers, \$4.50 to \$6; heifers, \$4.50; 50; cows, \$2.50 to \$6; calves, \$4.50.  
Hogs—Heavy and packers and butchers, \$7.50; mediums, \$5.50 to \$7.50; light Yorkers, \$6.50; pigs, \$4.25 to \$5.  
Sheep and Lambs—Lambs, \$8 to \$15; sheep, \$2 to \$7.

BALTIMORE, June 25.  
Butter—Fancy creamery, 42 1/2 to 44 1/2; 50; rolls, 25 to 30; store packed, 35.  
Eggs—The firsts, 26 to 28.  
Live Poultry—Young chickens, 35 to 45; old hens, 21 to 25; old roosters, 15c.

TOLEDO, June 25.  
Wheat, \$1.17 1/2 to \$1.18 1/2; corn, 94 1/2 to 96 1/2; soybeans, \$1.25 to \$1.26; cloverseed, \$11.50.

### WRITER TELLS GOOD POINTS OF ARMY ANT

#### Indians Find Insects Good Louse Exterminators.

Everybody has heard a lot of the horrible tales about the "army" or "driver" ants; how they sweep across the country in vast glistening sheets several hundred yards wide and devour every live thing in their path, pulling down and swarming over wild beasts and reptiles alike, each taking a mouthful and passing on; how more than one brutal criminal—in fiction—has finally met his just deserts amidst gruesome details at their hands, or rather jaws.

Tosh. All of it. As a matter of fact the army ants—there are several species—are not bad fellows at all, writes Gordon MacCreagh in Adventure. I venture to assert that nobody in all Amazonas has ever seen a column of them more than a foot in width. I have seen dozens of their trails as wide as eight inches, but never more.

It is true they run to three-quarters of an inch in length and that they can bite a piece of flesh out with each nip, as well as sting like a hornet; but no beast that is able to get up and hop need ever be eaten up by a column of army ants.

No, bugs are what the army ant is out for. Worms, beetles, fat caterpillars, sweet things—and, of course, criminals bound to trees. It is common for an Indian, meeting a column, to lay a honey trail to his hut, gather up his brats and his string of baical-hao and clear out for the afternoon. The ants come in thankfully and devour that hut with a thoroughness which would be a shining example to any firm of bug exterminators at \$10 a room; and with sundown they return peacefully home. Mr. Infanter enters and spends his first peaceful night in months.

Sometimes they happen along without any honey trail. I have camped in a deserted hut to take a siesta while the afternoon sun passed over, and have been awakened by the yell of "Carralho! Formigas maleficas!" and have realized the next second that the poignant words meant malignant ants.

Upon that occasion I waited not upon the order of my going, but just went with speed and sat me down in deep water—and began to understand then why that perfectly good hut had been deserted. With sundown the peons ventured back to collect our gear.

But it was canned grub that evening; for the formigas had eaten up a big potful of dinner.

But at that there are worse ants in Amazonas than the army ant.

#### Novelists Best Tenants

"We like to have tenants who receive as few callers as possible," said the manager of a big office building, according to Fred Kelly, writing in the Nation's Business. "Those who have a stream of people coming all day long help to congest the elevator service."

"On this basis a high-priced surgeon is more desirable than a dealer in cheap building lots, for fewer people are able to consult the surgeon than might wish to talk about the lots. The ideal tenant, though, would be a novelist. We once had one. He wanted a quiet place to work and didn't let any of his friends know where he was. His name was not in the building directory and he didn't even receive mail there. I don't believe he had a single caller the eleven months he was with us. I'd like to manage a building for hard-working novelists."

#### A Distant Relative

At the wedding anniversary of a railway magnate, one of the guests, noticing a somewhat lonely-looking and rather shabbily-attired man in a corner of the room, walked over to him.

"I was introduced to you," he said, "but I did not catch your name."

"My name," replied the other, "is Swaddleford."

"Oh, then you are a relative of our host?"

"Yes," rejoined the "poor relation." "I am his cousin, one hundred thousand sounds removed."

#### She Was One of Them

"Yes," said Boggs, unthinkingly, "I can remember events of long ago as if they happened but yesterday. When I think of my boyhood days—of my escapades at school, of many of my youthful and later actions, and how I got married—I can't help smiling and thinking how many foolish things I've done."

And Boggs wondered why his wife treated him so coolly after the visitors had gone.

#### Kept Them Awake

"Ain't got no Shakespearean actors now like what we had in the old days," declared Hank Hayfoot, a prominent member of the grocery lyceum.

"This is the repressed school," retorted the city fellow who happened to be present. "You're thinking about the old-style robust school. All those fellows could do was to rant around and bellow."

"Well, they kept us awake, anyhow."

#### Yes, by All Means

The Chap—You're getting prettier every day, Miss Daisy.

The Damsel—Now, Mr. Nottingham, you're really putting it on a little too thick.

The Chap—Well, let's say every other day then.

### Creosoted Fence Posts

#### Last for Many Years

The fact that wood is becoming scarce and labor more expensive is causing farmers to seek means of making their fence posts last longer, says the New York Times. Experimenters have shown that creosote will solve the problem, according to the New Jersey College of Agriculture.

Prof. E. R. Gross of the college states that fence posts treated in creosote will last three to five times as long as untreated posts, this being especially true of the softer varieties such as willow, ash, elm, soft maple, white cedar and cottonwood. Many consider it inadvisable, however, to creosote the harder woods, including oak, red cedar and chestnut.

The college recommends the use of round posts for creosoting rather than split posts, as the penetration will be more uniform. All bark must be stripped off and the timber well seasoned before creosoting.

"Creosote eight to ten inches above the depth to which the post is to be set since most rotting takes place at or just below the ground line," says Dr. Gross. "Posts three or four inches in diameter at the top give best results, as they are strong enough for most purposes and usually last as long as larger posts. It is important to get thorough and deep penetration of the creosote. A good vat is made of an old steel barrel set over a roughly constructed furnace. The creosote is kept at the boiling point and each batch of posts is left in the vat about two hours, depending on the rapidity of penetration. One inch penetration should be obtained. In order to determine this a post may be split or sawed in two. The tops of the posts should either be dipped or painted with hot creosote. A farmer having a wood lot may well spend a few days this winter cutting posts. Next winter these posts will be properly seasoned for creosoting."

#### Seeing Things

Opening a wine shop near the famous leaning tower of Pisa, a native struggled for several months and then suddenly pulled up stakes overnight, removing to a distant part of the city.

An American friend ventured to inquire the cause of his hasty departure. The explanation was graphic.

"Ze tourist, he came to my wine shop. He takes two drinks of my good wine, maybe three. He stroll out. He see zat leaning tower. He rush to ze notary and take ze pledge. I have to move."—Rehoboth Sunday Herald.

#### REMEMBER

WE DO THE BEST CLEANING AND PRESSING IN TOWN.

GEO. W. LITTLETON

#### Knots in Boards.

Knots in boards are the result of branches which extend from the center of the tree to the outside. After a branch has died and a cambium of living wood grows over the old piece of branch, a knot forms. All trees have abundant knots, but some clean themselves of their lower branches through rapid decay. When trees free themselves from branches readily and growth is rapid a good amount of clear lumber is formed.

Gift of \$300,000 to Harvard university was announced for a new dormitory to be named for the late Isidor Straus.

A radio loud speaker operated until a late hour every evening is a public nuisance, according to a ruling by Magistrate Greaser of New York.

#### Establishing Credit

If you never break a promise, if you always pay the money you owe exactly on the day it is due, nobody will know but that you are worth a billion. And you will be just as good a risk as a man worth a billion, for all that he could do would be to pay promptly on the due date.—Hamilton Fish.

### WRITER TELLS GOOD POINTS OF ARMY ANT

#### Indians Find Insects Good Louse Exterminators.

Everybody has heard a lot of the horrible tales about the "army" or "driver" ants; how they sweep across the country in vast glistening sheets several hundred yards wide and devour every living thing in their path, pulling down and swarming over wild beasts and reptiles alike, each taking a mouthful and passing on; how more than one brutal criminal—in fiction—has finally met his just deserts amidst gruesome details at their hands, or rather jaws.

Tosh. All of it. As a matter of fact the army ants—there are several species—are not bad fellows at all, writes Gordon MacCreagh in Adventure. I venture to assert that nobody in all Amazonas has ever seen a column of them more than a foot in width. I have seen dozens of their trails as wide as eight inches, but never more.

It is true they run to three-quarters of an inch in length and that they can bite a piece of flesh out with each nip, as well as sting like a hornet; but no beast that is able to get up and hop need ever be eaten up by a column of army ants.

No, bugs are what the army ant is out for. Worms, beetles, fat caterpillars, sweet things—and, of course, criminals bound to trees. It is common for an Indian, meeting a column, to lay a honey trail to his hut, gather up his brats and his string of bacalhao and clear out for the afternoon. The ants come in thankfully and devour that hut with a thoroughness which would be a shining example to any firm of bug exterminators at \$10 a room; and with sundown they return peacefully home. Mr. Injun re-enters and spends his first peaceful night in months.

Sometimes they happen along without any honey trail. I have camped in a deserted hut to take a siesta while the afternoon sun passed over, and have been awakened by the yell of "Carraho! Formigas maleficas!" and have realized the next second that the poignant words meant malignant ants.

Upon that occasion I waited not upon the order of my going, but just went with speed and sat me down in deep water—and began to understand then why that perfectly good hut had been deserted. With sundown the peons ventured back to collect our gear.

But it was canned grub that evening; for the formigas had eaten up a big potful of dinner.

But at that there are worse ants in Amazonas than the army ant.

#### Novelists Best Tenants

"We like to have tenants who receive as few callers as possible," said the manager of a big office building, according to Fred Kelly, writing in the Nation's Business. "Those who have a stream of people coming all day long help to congest the elevator service."

"On this basis a high-priced surgeon is more desirable than a dealer in cheap building lots, for fewer people are able to consult the surgeon than might wish to talk about the lots. The ideal tenant, though, would be a novelist. We once had one. He wanted a quiet place to work and didn't let any of his friends know where he was. His name was not in the building directory and he didn't even receive mail there. I don't believe he had a single caller the eleven months he was with us. I'd like to manage a building for hard-working novelists."

#### A Distant Relative

At the wedding anniversary of a railway magnate, one of the guests, noticing a somewhat lonely-looking and rather shabbily-attired man in a corner of the room, walked over to him.

"I was introduced to you," he said, "but I did not catch your name."

"My name," replied the other, "is Swaddleford."

"Oh, then you are a relative of our host?"

"Yes," rejoined the "poor relation."

"I am his cousin, one hundred thousand sounds removed."

#### She Was One of Them

"Yes," said Boggs, unthinkingly. "I can remember events of long ago as if they happened but yesterday. When I think of my boyhood days—of my escapades at school, of many of my youthful and later actions, and how I got married—I can't help smiling and thinking how many foolish things I've done."

And Boggs wondered why his wife treated him so coolly after the visitors had gone.

#### Kept Them Awake

"Ain't got no Shakespearean actors now like what we had in the old days," declared Hank Hayfoot, a prominent member of the grocery lyceum.

"This is the repressed school," retorted the city fellow who happened to be present. "You're thinking about the old-style robust school. All those fellows could do was to rant around and bellow."

"Well, they kept us awake, anyhow."

#### Yes, by All Means

The Chap—You're getting prettier, every day, Miss Daisy.

The Damsel—Now, Mr. Nottingham, you're really putting it on a little too thick.

The Chap—Well, let's say every other day then.

### Creosoted Fence Posts Last for Many Years

The fact that wood is becoming scarce and labor more expensive is causing farmers to seek means of making their fence posts last longer, says the New York Times. Experimenters have shown that creosote will solve the problem, according to the New Jersey College of Agriculture.

Prof. E. R. Gross of the college states that fence posts treated in creosote will last three to five times as long as untreated posts, this being especially true of the softer varieties such as willow, ash, elm, soft maple, white cedar and cottonwood. Many consider it inadvisable, however, to creosote the harder woods, including oak, red cedar and chestnut.

The college recommends the use of round posts for creosoting rather than split posts, as the penetration will be more uniform. All bark must be stripped off and the timber well seasoned before creosoting.

"Creosote eight to ten inches above the depth to which the post is to be set since most rotting takes place at or just below the ground line," says Dr. Gross. "Posts three or four inches in diameter at the top give best results, as they are strong enough for most purposes and usually last as long as larger posts. It is important to get thorough and deep penetration of the creosote. A good vat is made of an old steel barrel set over a roughly constructed furnace. The creosote is kept at the boiling point and each batch of posts is left in the vat about two hours, depending on the rapidity of penetration. One inch penetration should be obtained. In order to determine this a post may be split or sawed in two. The tops of the posts should either be dipped or painted with hot creosote. A farmer having a wood lot may well spend a few days this winter cutting posts. Next winter these posts will be properly seasoned for creosoting."

#### Seeing Things

Opening a wine shop near the famous leaning tower of Pisa, a native struggled for several months and then suddenly pulled up stakes overnight, removing to a distant part of the city.

An American friend ventured to inquire the cause of his hasty departure. The explanation was graphic.

"Ze tourist, he came to my wine shop. He takes two drinks of my good wine, maybe three. He stroll out. He see zat leaning tower. He rush to ze notary and take ze pledge. I have to move."—Rehoboth Sunday Herald.

#### REMEMBER

WE DO THE BEST CLEANING  
AND PRESSING IN TOWN.  
GEO. W. LITTLETON

Knots in Boards.

Knots in boards are the result of branches which extend from the center of the tree to the outside. After a branch has died and a cambium of living wood grows over the old piece of branch, a knot forms. All trees have abundant knots, but some clean themselves of their lower branches through rapid decay. When trees free themselves from branches readily and growth is rapid a good amount of clear lumber is formed.

Gift of \$300,000 to Harvard university was announced for a new dormitory to be named for the late Isidor Straus.

A radio loud speaker operated until a late hour every evening is a public nuisance, according to a ruling by Magistrate Greaser of New York.

#### Establishing Credit

If you never break a promise, if you always pay the money you owe exactly on the day it is due, nobody will know but that you are worth a billion. And you will be just as good a risk as a man worth a billion, for all that, he could do would be to pay promptly on the due date.—Hamilton Fish.

#### A Lost Art

The Guide—Look at that half-ruined castle—it must be at least eight hundred years old. Believe me, lady, they don't build such ancient castles these days!—From Pasquino, Turin.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

## DO YOU KNOW THAT

1. Run-down shoe heels are not easy seen by the wearer, but they detract greatly from your otherwise good appearance?
2. When heel linings are torn, relining will greatly cut the stocking bill?
3. Welt shoes for ladies are more economical to resole than Turn shoes?
4. Heels can be changed in any shape or height?
5. Kid leather shoes of any color can be dyed black to look like new?
6. It pays to have your shoes repaired at the best shop in town and one that has always had for its motto:

"Best Material, Best Workmanship  
Best Service"

## HERRICK REFRIGERATORS

### The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herriek answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herriek is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective insulation.
- No. 3. Air-tight construction.

That the Herriek has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

## MAIL PILOT FINDS NEW ALASKA ROUTE

### Flyer, Lost in Arctic Darkness Cuts Time 16 Days

Washington.—Lost in an airplane in the stygian darkness of an Alaskan night, without a star above or a light below to guide him, was the experience of Carl B. Eielson, air mail pilot, on his first trip over an experimental route between Fairbanks and McGrath, Alaska, according to his report received recently by Postmaster General New.

So interesting was the report of Eielson's adventure that the postmaster general read it at cabinet meeting and President Coolidge wrote a personal letter to the air mail pilot congratulating him. Accompanying this letter went a similar one from Mr. New.

"I congratulate you on the conspicuous success of your undertaking," the President said. "Your experience provides a unique and interesting chapter in the rapidly developing science of aerial navigation."

Eielson made the first leg of his trip from Fairbanks to McGrath without mishap. He began the return trip at 2:35 p. m.

"I expected," Eielson said in his report, "to get home by 5:10 p. m., at dusk. In one hour and fifteen minutes later I reached Lake Minchumina, which is nearly half way. Later I passed over a stream which was not on the map and I thought it must be the Kantishna river. Still later I reached this stream, but thought it was the Tanana river.

"To the left I saw a bluff which looked like the Nenana bluff. I struck for the bluff and everything was all right except that the town of Nenana was not in its place. By this time it was pitch dark. I could not believe that I had got 50 miles off my course after the same compass course had brought me half way exactly on the course. I left the river, going east.

"I wandered around completely lost for most of an hour. I went back to the big river and, while following it, saw a flare in the distance. I hit for it and it turned out to be my home field. There was a light in front of the hangar."

Among the letters brought from McGrath by Eielson was one addressed to Paul Henderson, second assistant postmaster general. This letter arrived in Washington 16 days earlier than it could have had the first stage of its journey been made by dog team.

### Sole Heir to Estate Valued at \$50,000,000

Bert Wirth of Lodi, Calif., sole heir to an estate left by his late grandfather, Henry Martin Wirth, who passed away in London, England, is receiving scores of letters daily containing proposals of marriage and applications of men desiring to act as his private secretary. He is a "grass widow" and aged forty-seven years. He has a son, Henry, living in Oakland, and a daughter, Mrs. Mary Carpenter, residing in San Francisco. The estate, states Wirth, consists of 65,000 acres of land and gold and copper mines in Australia, apartment houses and residences in European cities and 246 oil royalties in addition to thousands and thousands of dollars in cash. "The estate is estimated to be worth over \$50,000,000," states Wirth, "and as soon as it is settled I will put competent managers in charge and continue to live in Lodi where I was born."

### Map of World Made by Columbus Found in Paris

Paris.—A map made by Christopher Columbus has been found in the National library by M. De La Ronciere, librarian, who believes it inspired the voyage on which America was discovered. It was filed by mistake as a Portuguese map of the Sixteenth century. It represents the earth in the form of an island enveloped by four oceans and gives in detail the coast lines of Europe and of Africa.

### Woman Bobs at 100

Los Angeles, Cal.—Mrs. Elizabeth Goodrich, who journeyed west from Beaver Dam, Pa., in a covered wagon in 1842, and had her hair bobbed in Los Angeles barber shop in 1924, celebrated her one hundredth birthday at her Montebello home, near here.

### Temperatures of Ocean Water.

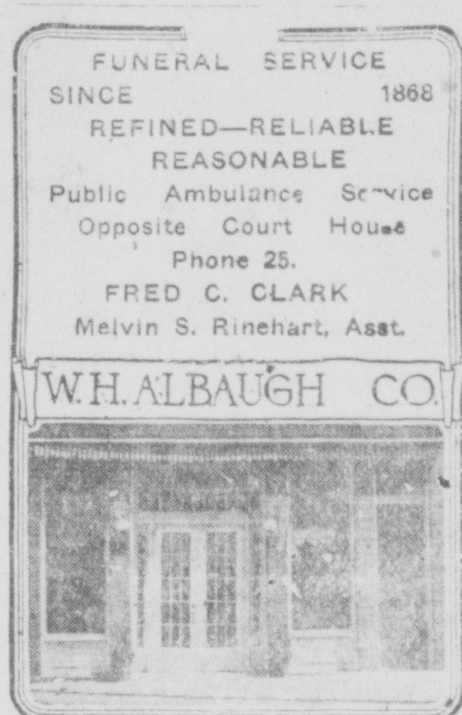

When the Gulf stream and the ice-berg laden Labrador current meet off the southern edge of the Grand Banks of Newfoundland extreme differences in the temperature of the sea water are often observed over short distances. The blue water of the Gulf stream can sometimes be seen to be separated by a sharp line of division from the dark and icy water from the north. This dividing line is what is known as the "cold wall." While on ice patrol duty last spring, a United States coast guard cutter stopped in a position directly across the "cold wall." The temperature of the water at the bow was found to be 34 degrees, while that at the stern was 56 degrees.

### Persecution for Witchcraft.

The extraordinary delusion of witchcraft broke out among the Puritans at Salem, Mass., in 1692, and caused the deaths of twenty persons, nineteen of whom were hanged and one pressed to death. A reaction soon after set in; and, although in January, 1693, three others were condemned, no more executions took place, and soon after all suspected persons were discharged from custody. The responsibility for the Salem atrocities has been put on Cotton Mather, the Puritan theologian. He did much to fan the flame of fury among the New Englanders, and pursued with savage zeal all those persons supposed to be guilty of this crime.

### Penelope's Shroud.

During the long absence of Ulysses, king of Ithaca, at the siege of Troy, his wife, Penelope, was beset by numerous suitors for her hand. To put them off, she declared that she could not choose from among them, until she had finished weaving a shroud, or robe, for Laertes, her aged father-in-law. Penelope was careful to undo at night what she had woven by day, and thus managed to keep her suitors at a distance. This stratagem was finally discovered by her admirers, who thereupon renewed their attentions; but the timely return of Ulysses after an absence of 20 years put an end to their importunities.

REFRIGERATORS**

**The Big Difference In Refrigerators**

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

### New Device Is Used to Restore Old Buildings

In England there is employed an interesting process, called grouting, whereby old buildings are restored. In its original sense grout means no more than gruel. In its building sense it is a mixture of sand, cement and water sufficiently thin to be poured. It is not a new thing, for it was probably used by the Romans, and has been employed very much since their time in engineering work. The comparatively new thing is the grouting machine, which enables the grout to be driven into places where it cannot be poured.

It is a simple machine, consisting of two parts, a cylinder of compressed air, the pressure being 100 pounds to the square inch, and a churn. A flexible hose connects them and another flexible hose with a nozzle leads out of the churn.

The dust and decayed mortar are blown out of the cracks between the stones with a jet of compressed air; clean water is then blown in to dampen the masonry just enough to make the cement adhere. Meanwhile the cement is put into the churn or grouting pan and is beaten up until it is about the consistency of cream. The preparation of it must be made carefully or the cement will grow hard in the churn and the hose. The wall being ready, the nozzle is inserted into a crack, the cracks above and below it are covered with clay to prevent the cement from leaking out, the compressed air is turned on and, passing through the grouting pan, drives the cement deep in between the stones.

Starting at the base of the building and working upward, the grouting machines will fill the whole of its walls with a new cement that reaches every crack and hole, so that when it has grown hard the building is as firm as if it were cut out of one stone. And it does this without breaking the weather-crumbled surface of its masonry or even rubbing off the mosses and lichens that have grown there.

#### Memory

"I am certain that in the academic world we always have put too much stress upon memory and not enough upon reasoning," Dr. Herbert S. Langfeld of Harvard said recently.

"Memory is the storehouse of information and one of the best assets of the high-powered brain. But memory under another guise is harmful. There is the student, for instance, who easily memorizes lessons, using his mind as a kind of photographic plate, without any real mental activity.

"Memories of that sort often are the most fertile for the time being; they will easily absorb and supply on demand almost any information required. But the mind as a whole does not get the instruction required, and this information later on slips from the photographic memory plate without any special benefit to the student, no matter how high he may have stood in classes."—New York Times.

#### First Sound Over Phone

The first sound was transmitted by telephone in Boston June 2, 1875. The first words were transmitted in the same city March 10, 1876, over a line less than 100 feet long, when Thomas A. Watson heard Alexander Graham Bell say: "Mr. Watson, please come here; I want you." At the time Bell was standing in a little attic at 5 Exeter place and talked over a crude telephone of his own invention to his associate. The first real telephone conversation took place October 9, 1876, over a line two miles long, between Boston and Cambridge, Professor Bell and his associate doing the talking. The first newspaper report transmitted by telephone was sent from Salem, Mass., to the Boston Globe February 12, 1877.

#### To Stop Shoe Squeaks

Shoes squeak because the pieces of leather forming the soles do not lie close together, and rub and bend with the movement of the feet.

A good plan to stop squeaking is to put a little sweet oil in a pan or dish and place the shoes to soak over night. They will take up enough oil to deaden the squeak and it is also good for the leather.

Another method is to remove a few rivets along the side of the shoe and insert powdered graphite or chalk or thin pieces of felt rubbed with chalk, and rivet up again. Three or four more small nails or pegs may be driven into the center of the sole, but this reduces the flexibility of the shoes.—London Tit-Bits.

#### When Asquith Laughed

Mr. Asquith was addressing a political meeting one day when some one in the audience made a very personal remark concerning Mrs. Asquith.

"Who said that?" demanded the speaker, angrily.

"There was a sudden silence. Then a man in the rear stood up and, pointing to a farmer wearing a dilapidated straw hat, shouted: 'It was him wiv the coo's breakfast on his head.'"

The reply was altogether too much for Mr. Asquith, and he had to join in the general roar of laughter.—Boston Transcript.

#### Diplomacy

Distracted Lady—Oh, dear me, please tell me how to word this telegram to my husband. I want to tell him that the baby is sick, the cook has left, the water pipes are frozen and I want him to come home at once.

Telegraph Clerk—If you want him to come at once you'd better say: "Good news—return immediately."—Boston Transcript.

## BEAUTIFUL CEREMONY

Miss Leona Morris and Mr. Pope Caruth Married Tuesday.

Rite Was Solemnized in Presbyterian Church by Rev. Floyd Emerson Logee. Bride Is Social Favorite and Groom Is Prominent in Business.

Tuesday morning, at half after ten, the marriage of Miss Elizabeth Leona Morris, only daughter of Mrs. Joseph Adkins, to Mr. Henry Pope Caruth, of Chillicothe, was solemnized in the Presbyterian church, the pastor, Rev. Floyd Logee, officiating. The church was artistically decorated in baskets of roses and delphinium. Miss Abbe Mills Clarke presided at the organ, and while the guests awaited the arrival of the bridal party, Mrs. Walter Scott, of Columbus, sang "Oh, Promise Me" and "At Dawning."

Miss Miriam Ruggles was bridesmaid and Miss Morris' only attendant. Mr. Caruth chose for his best man, Mr. Russell Savage of Chicago. The ushers were Mr. Carl Swenning, Dr. Aldrich, of Chillicothe and Richard Stoltz, Dayton. To the Lohengrin march Miss Ruggles entered and proceeded down the long aisle. She wore pink chiffon, a large pink picture hat and carried pink flowers. The bride followed; she was alone. Her gown was lavender chiffon, caught with a cross of pearls, an heirloom in the groom's family. She also wore the large hat to match her dress, and her bouquet was of white roses. The two presented a scene that was fair to look upon; one thought of the blue sky of the summer day. The young life, with its color setting, and permeated with the sacredness of the occasion seemed a real part of the beauty of the June morn. The groom with his best man, entering another door, proceeded across the front of the church, met the bride and advanced to the altar.

A wedding breakfast was served at the home of the bride's parents, Judge and Mrs. Adkins, to about fifty invited guests. The house was pretty in the season's flowers. Judge and Mrs. Adkins receiving had with them Mr. Henry Pope, an uncle of the groom and Mrs. Carl Swenning, a niece of Mr. Caruth. Mrs. Adkins wore gray charmeuse and Mrs. Swenning blue chiffon.

The big, decorated cake was in the center of the bride's table. Around the winsome bride besides the groom were Mr. Russell, Miss Ruggles, Mr. Francis Pope, Miss Virginia Shulze, Mr. Richard Stoltz, Miss Helen Bennett, Mr. Jean De Weese, Miss Louise Renick, Mr. and Mrs. Joseph Noecker, Dr. and Mrs. Frederick Aldrich, Mr. and Mrs. Carl Swenning. The presents were beautiful.

Guests present from a distance were Mr. Henry Pope, of Chattanooga, Tennessee; Mr. R. P. Houk Sr., Mr. B. T. Houk Jr., Mr. and Mrs. William Hurlbut, Mr. and Mrs. Speed Warren, Mr. and Mrs. Charles Sutherland, Mr. and Mrs. Rufus Worrell, Mr. Richard Stoltz, Dayton; Dr. and Mrs. Loy Hoyt, Mr. and Mrs. Traquair, Mr. and Mrs. Carl Swenning, Dr. and Mrs. Frederick Aldrich, Mr. Earl Barnhart, Miss Isabel Englerlin, Chillicothe; Mr. Claypool, Mrs. Carrie Beechler, Frankfort; Mrs. Louis Huber, Mrs. William DeWeese, Mr. John DeWeese, Delphos, and Mrs. Walter Scott, Columbus.

The bride is very charming; she attended the Ward-Belmont school, after which she taught in Frankfort, Ohio. As manager of the Mead Pulp & Paper Mills, the groom is a prominent figure in the business world of Chillicothe. The young couple have the best wishes of many friends.

#### Knew Their Place

Before beginning his sermon one Sunday night a negro preacher making his announcements, among other things, said, "Brethren and sisters, I want you all to condole with Brother Jones, where I am being entertained; last night he left his hencoop door open and 16 fat Plymouth Rock chickens went back home."

#### Prickly Pear a Pest

The obnoxious weed, the prickly pear, already covers 5,000,000 acres of land in New South Wales, and is spreading at the rate of 20,000 acres a month.

#### BORN

To Mr. and Mrs. Noah Diltz, 1108 South Court street, Tuesday, June 25, 1924, a daughter.

To Mr. and Mrs. Charles Davis, 485½ Reynold avenue, Columbus, an 8½ pound daughter, Annette Margaret. Mrs. Davis was Miss Iva Myers of this City.

#### CLING TO ANCIENT CUSTOM

Albanian Tribal Laws Govern Behavior as They Have Done Throughout the Centuries.

It was in a Scutari house that I sat drinking coffee with three generations of women. The grandmother had been of a mountain tribe, but she married in Scutari and, as is the custom, had never seen her people again. But the old tribal laws still held her, and she blushed with shame when the interpreter told me that her granddaughter, busy at her loom weaving stuffs for her marriage dowry, had seen the man she was to marry.

"Young people in these days have no shame," she said sternly. "It is the life of the cities that corrupts them. Ay! I remember well that even with my own daughter I had my troubles. True, I had brought her up to be a good, modest girl, and she never saw her husband until she was safely married to him in his house. But she did not want to marry him, because she had heard that he was old and ugly. Ay! what days! She would break the honor of our family, she would go before the chiefs and swear to live all her life a virgin. She was like a mad one. At last we had to beat her very terribly, and she was nearly dead when we took her to her husband's house. Yes, I remember it well."

The daughter, mother of the young girl who was weaving her dowry, smiled at the memory. "Ah, yes, I was a bad one," she said placidly. "Young girls do not know what is good for them. Yes, indeed, if my daughter would not marry the good man we have chosen, I would beat her also. It was not with my consent that she saw him; one cannot help it now. Only, she does not leave this house again until her wedding day."

Thus, even in modern, Catholic Scutari, one finds the old Law of Lee still alive beneath the surface. For among the primitive mountain peoples, where each tribe is said to have descended from a common prehistoric ancestor, marriage within the tribe is as unthinkable as marriage between brother and sister, and girls are betrothed always to men of strange tribes, whom they have never seen.—Rose Wilder Lane, in World Traveler Magazine.

#### Divers Had to Fight Fish.

In their hunt for gold lost when the Laurentic was torpedoed during the war, a corps of deep-sea divers are armed with large knives with which to fight off attacks of dogfish. The salvage ship Raver has just left Portsmouth for Lough Swilly, where the Laurentic was torpedoed and sunk in January, 1917. The Laurentic carried a cargo of bullion for the United States amounting to \$25,000,000, and of this just over \$7,500,000 has been recovered. The other \$17,500,000 of gold lies scattered about the bed of the sea off the north coast of Ireland, about fifteen miles off the entrance to Lough Swilly. The Racer had been working until August of last year, but the weather then was so rough that operations had to be stopped. The gold lies at a depth of twenty fathoms (120 feet), and as the rough Atlantic has beaten the wreckage into fragments it is mostly hidden under sand, which makes the divers' work most difficult. The decks of the Laurentic are now settled on the sea bottom and cover an area of several hundred feet. Steam suction pipes operated from the Racer remove the sand.

#### Advertises for a Thrill.

The other afternoon a young American rented an airplane at the Bourget field which he will utilize, he declares, to scatter handbills all over Paris. A sample of these handbills reads as follows:

"An American, for the first time in Paris, would like to lunch at noon next Tuesday with the most interesting anarchist in the capital; Wednesday, with a graduate student of art or music; Thursday, with an actress; Friday, with some lady who intends to commit suicide, and Saturday, with a nobleman."

"In exchange for this entertainment he offers the luncheons, music and intelligent conversation."

The address of an American advertising agency follows, and then the name of this original visitor—Lionel P. Tompkins.—From Le Petit Parisien, Paris. (Translated for the Kansas City Star.)

#### Prison Graduates.

In Guatemala one of the members of a United States local church lost a horse by theft and reported at once to the police. But the latter considered it simpler to arrest the informant than to catch the robber, and so sent him to jail for two years. There he established a college. Courses of study were given by the lawyers and other educated prisoners; and as most prisoners had to remain in jail from two to five years awaiting sentence of the court there was time to acquire a considerable amount and variety of knowledge. But the unionist forces in the late rebellion set all prisoners at liberty. Now the prison is again filling up, but no church members are among the inmates.

#### Used to Horses.

Imagine my husband driving a new automobile for the first time after being used to horses. He saw some one on the street he wanted to talk to, so he ran the car up close to the curb, and, bracing himself, grabbed the steering wheel and said, "Whoa!" It surely was embarrassing to me when every one laughed.—Exchange.

## HARRIS SHOW

Big Exhibition Will be in Circleville Tuesday, July 8.

Harris Bros., famous combined shows will exhibit in Circleville, Tuesday, July 8.

Traveling aboard its own special train of railroad cars, this famous tented organization will appear this season fresh from four years of foreign triumphs and conquests. Enlarged twofold of its former size, the Great Harris Bros., shows has grown and prospered the past two generations, until today its appearance is hailed as an annual festival holiday, revealing a fairyland ever so dear to childhood's happy days.

Many new and unparalleled features of magnificence, novelty, daring and vastness will be displayed in this season's big show. Foremost among the features will be a display of wild animals appearing within an immense steel arena; the imperial Jordan family of acrobats; the Jackson sextette risely artists; the 8-Micados, Japanese gymnasts; the Avalon sisters, tight wire dancers; Kimball Bros., somersault champions and scores of other internationally known performers.

The big show represents an expenditure of nearly \$400,000. It is now in its 28th consecutive season, which a transcontinental tour of America and Canada will be made. An immense double menagerie is carried as a special feature of this season's big show. Tango, the earth's largest living animal, an elephant nine feet two inches high and weighing six tons, will be found besides a midget elephant, scarcely three feet high. Royal Bengal tigers; black maned Nubian lions from the great forest; pumas, jaguars, leopards, weasels and a whole caravan of camels from the Siberian waste will be displayed under the canvas domed zoo.

There will be two performances at 2 and 8 p. m., the doors opening an hour earlier. A free exhibition will be seen on the show grounds preceding each performance, in addition to a concert by Professor John Griffin's military band. Indications point to a record breaking crowd on show day.

#### COMMANDERY MEETING.

There will be a stated convocation of Scioto commandery Thursday evening in the Masonic temple at 7:30 o'clock. Election of officers and payment of dues.

#### NOTICE, RED MEN.

On the sleep of the 26th Sun Hot Moon Congo Tribe will give a grand reception to our Brother L. E. Miller, great sachem of Ohio, to which all the Indians of this or any other hunting grounds are cordially invited to be present. All the great chiefs will be here, also Red Men's orchestra of Springfield will be with us. You will hear some good music and good, long talks by live wire Red Men. Plenty of Good eats. Come and enjoy the good things on this occasion as it only occurs once in a life time.

GEORGE C. VOLL

Chairman.

**BEAUTIFUL CEREMONY**

**Miss Leona Morris and Mr. Pope Caruth Married Tuesday.**

**Rite Was Solemnized in Presbyterian Church by Rev. Floyd Emerson Logee. Bride Is Social Favorite and Groom Is Prominent in Business.**

Tuesday morning, at half after ten, the marriage of Miss Elizabeth Leona Morris, only daughter of Mrs. Joseph Adkins, to Mr. Henry Pope Caruth, of Chillicothe, was solemnized in the Presbyterian church, the pastor, Rev. Floyd Logee, officiating. The church was artistically decorated in baskets of roses and delphinium. Miss Abbe Mills Clarke presided at the organ, and while the guests awaited the arrival of the bridal party, Mrs. Walter Scott, of Columbus, sang "Oh, Promise Me" and "At Dawning."  
Miss Miriam Ruggles was bridesmaid and Miss Morris' only attendant. Mr. Caruth chose for his best man, Mr. Russell Savage of Chicago. The ushers were Mr. Carl Swenning, Dr. Aldrich, of Chillicothe and Richard Stoltz, Dayton. To the Lohengrin march Miss Ruggles entered and proceeded down the long aisle. She wore pink chiffon, a large pink picture hat and carried pink flowers. The bride followed; she was alone. Her gown was lavender chiffon, caught with a cross of pearls, an heirloom in the groom's family. She also wore the large hat to match her dress, and her bouquet was of white roses. The two presented a scene that was fair to look upon; one thought of the blue sky of the summer day. The young life, with its color setting, and permeated with the sacredness of the occasion seemed a real part of the beauty of the June morn. The groom with his best man, entering another door, proceeded across the front of the church, met the bride and advanced to the altar.  
A wedding breakfast was served at the home of the bride's parents, Judge and Mrs. Adkins, to about fifty invited guests. The house was pretty in the season's flowers. Judge and Mrs. Adkins receiving had with them Mr. Henry Pope, an uncle of the groom and Mrs. Carl Swenning, a niece of Mr. Caruth. Mrs. Adkins wore gray charmeuse and Mrs. Swenning, blue chiffon.  
The big, decorated cake was in the center of the bride's table. Around the winsome bride besides the groom were Mr. Russell, Miss Ruggles, Mr. Francis Pope, Miss Virginia Shulze, Mr. Richard Stoltz, Miss Helen Bennett, Mr. Jean De Weese, Miss Louise Renick, Mr. and Mrs. Joseph Noecker, Dr. and Mrs. Frederick Aldrich, Mr. and Mrs. Carl Swenning. The presents were beautiful.  
Guests present from a distance were Mr. Henry Pope, of Chattanooga, Tennessee; Mr. R. P. Houk Sr., Mr. B. T. Houk Jr., Mr. and Mrs. William Hurlbut, Mr. and Mrs. Speed Warren, Mr. and Mrs. Charles Sutherland, Mr. and Mrs. Rufus Worrell, Mr. Richard Stoltz, Dayton; Dr. and Mrs. Loy Hoyt Mr. and Mrs. Traquair, Mr. and Mrs. Carl Swenning, Dr. and Mrs. Frederick Aldrich, Mr. Earl Barnhart, Miss Isabel Enderlin, Chillicothe; Mr. Claypool, Mrs. Carrie Beecher, Frankfort; Mrs. Louis Huber, Mrs. William DeWeese, Mr. John DeWeese, Delphos, and Mrs. Walter Scott, Columbus.  
The bride is very charming; she attended the Ward-Belmont school, after which she taught in Frankfort, Ohio. As manager of the Mead Pulp & Paper Mills, the groom is a prominent figure in the business world of Chillicothe. The young couple have the best wishes of many friends.

**Knew Their Place**  
Before beginning his sermon one Sunday night a negro preacher making his announcements, among other things, said, "Brethren and sisters, I want you all to condole with Brother Jones, where I am being entertained; last night he left his hencoop door open and 16 fat Plymouth Rock chickens went back home."

**Prickly Pear a Pest**  
The obnoxious weed, the prickly pear, already covers 5,000,000 acres of land in New South Wales, and is spreading at the rate of 20,000 acres a month.

**BORN**  
To Mr. and Mrs. Noah Diltz, 1108 South Court street, Tuesday, June 25, 1924, a daughter.  
To Mr. and Mrs. Charles Davis, 485 1/2 Reynold avenue, Columbus, an 8 1/2 pound daughter, Annette Margaret. Mrs. Davis was Miss Iva Myers of this City.

**CLING TO ANCIENT CUSTOM**  
Albanian Tribal Laws Govern Behavior as They Have Done Throughout the Centuries.

It was in a Scutari house that I sat drinking coffee with three generations of women. The grandmother had been of a mountain tribe, but she married in Scutari and, as is the custom, had never seen her people again. But the old tribal laws still held her, and she blushed with shame when the interpreter told me that her granddaughter, busy at her loom weaving stuffs for her marriage dowry, had seen the man she was to marry.

"Young people in these days have no shame," she said sternly. "It is the life of the cities that corrupts them. Ay! I remember well that even with my own daughter I had my troubles. True, I had brought her up to be a good, modest girl, and she never saw her husband until she was safely married to him in his house. But she did not want to marry him, because she had heard that he was old and ugly. Ay! what days! She would break the honor of our family, she would go before the chiefs and swear to live all her life a virgin. She was like a mad one. At last we had to beat her very terribly, and she was nearly dead when we took her to her husband's house. Yes, I remember it well."

The daughter, mother of the young girl who was weaving her dowry, smiled at the memory. "Ah, yes, I was a bad one," she said placidly. "Young girls do not know what is good for them. Yes, indeed, if my daughter would not marry the good man we have chosen, I would beat her also. It was not with my consent that she saw him; one cannot help it now. Only, she does not leave this house again until her wedding day."

Thus, even in modern, Catholic Scutari, one finds the old Law of Lee still alive beneath the surface. For among the primitive mountain peoples, where each tribe is said to have descended from a common prehistoric ancestor, marriage within the tribe is as unthinkable as marriage between brother and sister, and girls are betrothed always to men of strange tribes, whom they have never seen.—Rose Wilder Lane, in World Traveler Magazine.

**Divers Had to Fight Fish.**

In their hunt for gold lost when the Laurentic was torpedoed during the war, a corps of deep-sea divers are armed with large knives with which to fight off attacks of dogfish. The salvage ship Raver has just left Portsmouth for Lough Swilly, where the Laurentic was torpedoed and sunk in January, 1917. The Laurentic carried a cargo of bullion for the United States amounting to \$25,000,000, and of this just over \$7,500,000 has been recovered. The other \$17,500,000 of gold lies scattered about the bed of the sea off the north coast of Ireland, about fifteen miles off the entrance to Lough Swilly. The Racer had been working until August of last year, but the weather then was so rough that operations had to be stopped. The gold lies at a depth of twenty fathoms (120 feet), and as the rough Atlantic has beaten the wreckage into fragments it is mostly hidden under sand, which makes the divers' work most difficult. The decks of the Laurentic are now settled on the sea bottom and cover an area of several hundred feet. Steam suction pipes operated from the Racer remove the sand.

**Advertises for a Thrill.**

The other afternoon a young American rented an airplane at the Bourget field which he will utilize, he declares, to scatter handbills all over Paris. A sample of these handbills reads as follows:

"An American, for the first time in Paris, would like to lunch at noon next Tuesday with the most interesting anarchist in the capital; Wednesday, with a graduate student of art or music; Thursday, with an actress; Friday, with some lady who intends to commit suicide, and Saturday, with a nobleman."

"In exchange for this entertainment he offers the luncheons, music and intelligent conversation."  
The address of an American advertising agency follows, and then the name of this original visitor—Lionel P. Tompkins.—From Le Petit Parisien, Paris. (Translated for the Kansas City Star.)

**Prison Graduates.**

In Guatemala one of the members of a United States local church lost a horse by theft and reported at once to the police. But the latter considered it simpler to arrest the informant than to catch the robber, and so sent him to jail for two years. There he established a college. Courses of study were given by the lawyers and other educated prisoners; and as most prisoners had to remain in jail from two to five years awaiting sentence of the court there was time to acquire a considerable amount and variety of knowledge. But the unionist forces in the late rebellion set all prisoners at liberty. Now the prison is again filling up, but no church members are among the inmates.

**Used to Horses.**

Imagine my husband driving a new automobile for the first time after being used to horses. He saw some one on the street he wanted to talk to, so he ran the car up close to the curb, and, bracing himself, grabbed the steering wheel and said, "Whoa!" It surely was embarrassing to me when every one laughed.—Exchange.

**HARRIS SHOW**

**Big Exhibition Will be in Circleville Tuesday, July 8.**

Harris Bros., famous combined shows will exhibit in Circleville, Tuesday, July 8.  
Traveling aboard its own special train of railroad cars, this famous tented organization will appear this season fresh from four years of foreign triumphs and conquests. Enlarged twofold of its former size, the Great Harris Bros. shows has grown and prospered the past two generations, until today its appearance is hailed as an annual festival holiday, revealing a fairyland ever so dear to childhood's happy days.  
Many new and unparalleled features of magnificence, novelty, daring and vastness will be displayed in this season's big show. Foremost among the features will be a display of wild animals appearing within an immense steel arena; the imperial Jordan family of acrobats; the Jackson sextette risely artists; the 8-Micados, Japanese gymnasts; the Avalon sisters, tight wire dancers; Kimball Bros., somersault champions and scores of other internationally known performers.

The big show represents an expenditure of nearly \$400,000. It is now in its 28th consecutive season during which a transcontinental tour of America and Canada will be made. An immense double menagerie is carried as a special feature of this season's big show. Tango, the earth's largest living animal, an elephant nine feet two inches high and weighing six tons, will be found besides a midget elephant, scarcely three feet high. Royal Bengal tigers; black maned Nubian lions from the great forest; pumas, jaguars, leopards, panthers and a whole caravan of camels from the Siberian waste will be displayed under the canvas domed zoo.

There will be two performances at 2 and 8 p. m., the doors opening an hour earlier. A free exhibition will be seen on the show grounds preceding each performance, in addition to a concert by Professor John Griffin's military band. Indications point to a record breaking crowd on show day.

**COMMANDERY MEETING.**

There will be a stated conclave of Scioto commandery Thursday evening in the Masonic temple at 7:30 o'clock. Election of officers and payment of dues.

**NOTICE, RED MEN.**

On the sleep of the 26th Sun Hot Moon Congo Tribe will give a grand reception to our Brother L. E. Miller, great sachem of Ohio, to which all the Indians of this or any other hunting grounds are cordially invited to be present. All the great chiefs will be here, also Red Men's orchestra of Springfield will be with us. You will hear some good music and good, long talks by live wire Red Men. Plenty of Good eats. Come and enjoy the good things on this occasion as it only occurs once in a life time.

GEORGE C. VOLL  
Chairman.

AMUSEMENTS

Two devoted wives of gamblers are found in the gripping Paramount drama of New York financial and domestic life, "The Silent Partner," a Charles Maigne production, which will be the feature at the Met theater for three days beginning today. Only one has the strength of character to plan and carry thru reform of her spectacular husband. Another succumbs and is carried down to poverty; the third is ignorant of what her husband has done till too late. Leatrice Joy, Owen Moore and Robert Elson are featured.

Leatrice Joy is cast as the wife of a stock broker's clerk, played by Owen Moore. When he risks their modest fortune on the market, she prepares for the crash which she feels will ultimately come. From loving, domestic help meet, her character changes to that of a hard woman, secretive and cold, hoarding all her husband's wealth she can manage to lay her hands on, against possible financial ruin. Not until he has lost all does she become her affectionate self again.

Robert Edson is the broker who employs Moore as clerk, and afterward accomplishes his downfall in Wall street. It is the wife of another of his clerks, played by Patterson Dial who is too luxury-loving and weak to demand of her husband that he show her sufficient consideration to assure a definite income. Like the other couple, their wealth skyrockets. But when the bottom drops out, neither has saved, and both are forced into the slums.

Playing in the support are Robert Schable, Patterson Dial, E. H. Calvert, Maude Wayne, Bess Flowers, Lura Anson, Bert Woodruff and Robert Grey. This picture was directed by Charles Maigne and is said to be one of the best shown at this theater many weeks. The picture will be on view until Friday.

Child's Imagination

For the young child who exaggerates to the point of falsifying, the best cure is to allow him to let his imagination run rampant, with the express understanding that these are "fairly tales." Show him the difference between the real and the false. We must teach ethics but save the imagination, too.

STRAWBERRY SOCIAL

Will be given at the Jackson township school Thursday, June 26, by the Jackson grange. Everybody welcome. 25June1.

AT THE COURT HOUSE

Will of Mrs. Rose Morris.

The will of Mrs. Rose Morris has been probated. The testator makes the following bequests: To the children of John Lincoln, Solomon Lincoln and Sarah Morris, is given \$2000 in equal shares; Miss Georgia Davenport, \$300, Forest cemetery trustees, \$150; Home and Hospital, \$500; W. C. Morris, \$1500; Milton E. Morris, \$200; Edward Lincoln, \$500; Ella Deems, \$500. The residue of the estate is given to the executors in trust for the following persons; Solomon Lincoln, one-third, and the children of her sister, Sarah Morris, one-third in equal proportions. The other third is given to the brothers and sisters of her deceased husband, Samuel Morris, in equal proportions.

Milt and W. C. Morris were named and appointed executors of the estate. The will is dated July 27, 1918 and was witnessed by Martha Dresbach and H. B. Weaver.

The estate is estimated to be worth \$14,000 of which \$10,000 is personal.

The appraisers of the estate are O. S. Howard, H. B. Weaver, and George F. Grand-Girard.

PERSONALS

Miss Mildred Groom spent the day in Columbus.

Miss Minnie Pontius is visiting her cousin, Wilson Pontius at Obetz Junction.

Mrs. Ida Myers attended the funeral of Mrs. George K. Wright in Ashville today.

Miss Emma Porter spent the day in Columbus.

Mrs. Wayne Leist spent the day with her sister, Mrs. Leslie C. Flora, in Columbus.

Mrs. Albert Watson, Mrs. Earl Price and Miss Jane Sweetman spent the day in Columbus.

Misses Martha and Elizabeth Stevenson and nephew, Donald Watt, left today for a two months' trip to France, Italy and the British Isles. They will sail from the port of New York Saturday forenoon at 10 o'clock.

W. P. Sallady, general manager of The Dixie Mills Co., has returned from a business trip thru Ohio, Kentucky, and West Virginia, where he visited brokers of The Dixie Mills Co., which has an extensive business in this territory. The trip was made by auto and Mrs. Sallady accompanied him.

ATTENDED CONVENTION.

Mrs. G. G. Leist, Mrs. E. F. Anderson, Charles Schwin, General George Florence, W. S. Gearhart, H. B. Weaver and C. C. Chappellear, attended the Republican state convention as delegates from Pickaway county. Mrs. Anderson was a member of the committee on credentials and John E. Davis, of Shawnee, was chosen as presidential elector for this district.

IN PUBLIC HALL

Conference For Progressive Political Action Will Be Held.

Cleveland, June 25.—The conference for progressive political action will be held in the same hall in which the Republican national convention was held—the municipally-owned public hall. City council voted unanimously to let the conference use the hall for its convention July 4 on the same terms as those allowed the Republicans—a rental of \$1. It was originally planned to hold the progressive convention in the Brotherhood of Locomotive Engineers' auditorium, but it was feared that because of its seating capacity of only 1,500 many delegates would be crowded out. Gray's armory was found unsatisfactory for the same reason. The convention is expected to draw 2,000 delegates, besides scores of newspaper men.

Material in a Piano

More than 1,000 different pieces of material, varying from felt to wood, ivory and many kinds of metal, enter into the making of a high-grade piano.

GET YOUR BONDS.

For each dollar paid on subscription to the Daily and Weekly Union-Herald, we give \$16 in Aer-O-Plane bonds.

PICKAWAY LODGE NO. 23. F. & A. M. Special Communication

Wednesday evening, June 25, at 7:30 o'clock. Work in the M. M. degree. Brethren urged to be present. H. B. COLWELL, W. M. M. B. Trout, Secretary. 24June2.

ELECT OFFICERS

Ed Sensenbrenner is New President of Chamber of Commerce.

At the regular meeting of the chamber of commerce held Tuesday evening officers were elected for the ensuing year as follows: President, Edward Sensenbrenner; vice president, Lee T. Shaner; secretary, Elgar Barere; treasurer, Edward Crist; directors, E. W. Lutz, Walter Marion, T. O. Gilliland, R. L. Brehmer and J. D. Hummel.

The report of the treasurer shows that the body has some money in its "jeans" and is in a flourishing condition. The receipts for the year were \$1,134.48 and the expenditures were \$799.17.

The year starts out with a good deal of promise and if thirteen stands as a mascot the club has it, as the new president has thirteen letters in his name. He is a regular dynamo and is a go-getter. The thanks of the club was voted the outgoing president, Frank E. Barnhill, who has made a most efficient officer and governed the body during the past year with tact and enthusiasm. He turns the organization over to the new president in good shape.

Meaning of "Par"

"Par" is the established value of the monetary unit or of currency of one country expressed in the monetary unit or currency of another using the same metal as the standard of value.

POPULAR LOANS

ELECT OFFICERS

Ed Sensenbrenner is New President of Chamber of Commerce.

At the regular meeting of the chamber of commerce held Tuesday evening officers were elected for the ensuing year as follows: President, Edward Sensenbrenner; vice president, Lee T. Shaner; secretary, Elgar Barere; treasurer, Edward Crist; directors, E. W. Lutz, Walter Marion, T. O. Gilliland, R. L. Brehmer and J. D. Hummel.

The report of the treasurer shows that the body has some money in its "jeans" and is in a flourishing condition. The receipts for the year were \$1,134.48 and the expenditures were \$799.17.

The year starts out with a good deal of promise and if thirteen stands as a mascot the club has it, as the new president has thirteen letters in his name. He is a regular dynamo and is a go-getter. The thanks of the club was voted the outgoing president, Frank E. Barnhill, who has made a most efficient officer and governed the body during the past year with tact and enthusiasm. He turns the organization over to the new president in good shape.

Meaning of "Par"

"Par" is the established value of the monetary unit or of currency of one country expressed in the monetary unit or currency of another using the same metal as the standard of value.

POPULAR LOANS

\$25 to \$500 On your own security. No endorsers required. Convenient private offices. Friendly and obliging management. Over 25,000 loans amounting to nearly \$5,000,000 is our record since 1913. Resources over \$1,350,000. Concentrate your debts and bills in one place. Use our money. A safe place to borrow. City Loan service is popular, helpful, convenient, reliable and safe as a bank account in times of need. Open every day. THE CITY LOAN & SAVINGS CO. HARRY CROW Manager 113 North Court Street.

IN FIELD SECTION.

Miss Caroline F. Wolfley, who has a position with the bureau of census, Washington D. C., is now with the field section, doing statistics of cities and at present is at Chicago and nearby cities. While there she is with her sister, Mrs. Eleanor W. Bisell, who has a clerical position with the American headquarters of the Theosophical society, Chicago.

ATTENTION, SIR KNIGHTS.

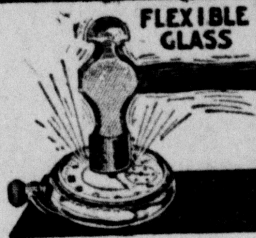

There will be a stated conclave of Scioto commandery Thursday evening in the Masonic temple at 7:30 o'clock. Election of officers and payment of dues.

Woman Causes Sensation

A woman in London created a sensation in the ballroom of a hotel by appearing with hair that glowed with phosphoric iridescence when the lights were dimmed.

A special display table has been built to accommodate our Bags and Suitcases so that a customer can look them over without bothering any one. If you are needing Luggage, come in and see ours. Everything is plainly marked, Bags, Suitcases, Trunks.

ATTENDED CONVENTION.

Mrs. G. G. Leist, Mrs. E. F. Anderson, Charles Schwin, General George Florence, W. S. Gearhart, H. B. Weaver and C. C. Chappellear, attended the Republican state convention as delegates from Pickaway county. Mrs. Anderson was a member of the committee on credentials and John E. Davis, of Shawnee, was chosen as presidential elector for this district.

IN PUBLIC HALL

Conference For Progressive Political Action Will Be Held.

Cleveland, June 25.—The conference for progressive political action will be held in the same hall in which the Republican national convention was held—the municipally-owned public hall. City council voted unanimously to let the conference use the hall for its convention July 4 on the same terms as those allowed the Republicans—a rental of \$1. It was originally planned to hold the progressive convention in the Brotherhood of Locomotive Engineers' auditorium, but it was feared that because of its seating capacity of only 1,500 many delegates would be crowded out. Gray's armory was found unsatisfactory for the same reason. The convention is expected to draw 2,000 delegates, besides scores of newspaper men.

Material in a Piano

More than 1,000 different pieces of material, varying from felt to wood, ivory and many kinds of metal, enter into the making of a high-grade piano.

## FICKARDT'S ROUP AND CHOLERA DROPS

On May 7, 1924, I called on Elmer Doner, Ashville R. F. D. No. 1, and he told me the following:—

I bought four hundred (400) chicks of a hatchery and while there I bought some tablets to prevent disease or cure them if they were sick. Very soon the chicks began to die, I tried the tablets that I had obtained at the hatchery. I then bought other tablets liquids and powders, all nationally advertised remedies, but none of them did any good and my chicks kept on dying until I had lost 250.

A friend of mine told me of Fickardt's Roup and Cholera drops, at that time I had ten sick chicks in a pen separated from the well stock and I really considered them as good as dead.

I began to use Fickardt's Roup and Cholera drops with all my chicks, both well and sick. Two of the sick ones died, the other eight recovered and I have not lost any others since I began to use Fickardt's Roup and Cholera drops over a month ago.

I would have probably thought that the disease had run its course if it had not been for the fact that these that were sick recovered, but seeing the sick ones get well has convinced me that Fickardt's Roup and Cholera drops cured them.

## Bright Color in Chic New Things

## Beads, Earrings and Gay Neckwear in Favor; Scotch Plaids Appear.

It is now so usual and is considered so smart to wear a string of beads, as well as earrings, brooch and other ornaments, that these appear in the smart shops in new versions almost daily. It would seem that the entire gamut had been run in the matter of stones, colors and designs, observes a fashion writer in the New York Times. In these days no woman is seen in morning, afternoon or evening dress without a necklace of some sort.

These wares are the most decorative that shopkeepers have ever had the opportunity of presenting to a smartly gown public, and their very display helps to sell them.

At the moment amethyst matrix is a tremendous favorite, quite supplanting carnelian, amber, topaz, jade, rose quartz and crystal. Amethyst is in itself so colorful that the matrix beads, with their crackly surface, make the most lovely bead strings, especially when put together with slight cut crystal.

An innovation in neckwear is plaited colored organdie, sold by the yard, of which to make collars and cuffs. There is quite a craze for these colored muslins, and white is less worn than ever before. The plaiting is pleated or hemmed, and sometimes is finished with a scalloped or pointed edge. It is very chic, especially for the flat, round collars and narrow cuffs of the one-piece coat dresses.

From the Highlanders of Scotland motifs are borrowed. Historic clan plaids now appear in the frocks, millinery and many fashionable toilet accessories. Most important is the overblouse, made like the juniors' middie, a straight-cut garment from shoulder to low hip line, where it is held to the figure with a wide belt or sash. Numberless blouses in this new model are made in crepe, silk, satin lingerie, batik or embroidered.

But a chic waist is that of plaid silk, to be worn with a skirt of plain color, tailored or plaited. One most effective is of black velvet, to which the bright plaid gives a merry contrast.

The fad for gay plaid materials is seen in the jaunty turbans, parasols, bags, cash ribbons, petticoats, brassieres and the like. A very late thing in umbrellas is not the virtuous old black affair we were reared to regard as correct, but a flashy thing covered with plaid silk, Scotch or whatever, so it be gay.

## Smart Cloche Is Made Entirely of Ribbons

This snappy cloche is made entirely of ribbons. It is double-faced in American Beauty and gold trimmed with flowers to harmonize.

## Cover and Score Pad That Will Add Cheer

A thoughtful hostess knows that for good bridge morale the right kind of table cover is necessary, so she gets a square piece of black satin and borders it with inch-wide gold metallic ribbon, with a luxurious tassel at each corner, which gives it weight and balance. The border is put on with liquid glue, a thin line spread along each edge of the ribbon, applied a few inches at a time and allowed to "set" before the surfaces are joined. Use only the best quality liquid glue.

A score pad to match the table cover is made by covering an ordinary pad with black satin ribbon, bordered with narrow gold metallic ribbon. All of the work is done with the best quality liquid glue. Material required: Five-eighths yard of 5½-inch ribbon for cover, two yards for lining and pocket insert, and two yards of one-half-inch ribbon for border.

## Three-Quarters Length Coat Is Worn in Paris

The very short and the very long coat have passed from the picture for the moment at least, and the three-quarters length coat is everywhere in evidence in Paris. Belts and other means of fastening are taboo on these models, which are wrapped closely about the figure and held in place by the wearer. They are developed from tasha, suede and sudeine in bright colors and are bound with black silk braid. Eyelet embroidery, an almost forgotten relic of the past, has been revived and is extensively used to ornament these coats, so necessary for the Riviera in its cooler moments.

the dress is worn a narrow belt of white leather.

This sleeveless, smart and thoroughly easy little frock is quite the rage and is being made in light twills, ribbed silk and poplins in pretty colors, with the under blouse of sheerest white, and with sunshade and shoes matching the dress in color.

Usually the hat is a small cloche shape in white with a bit of the color introduced with needlework.

Knitted or Woven Dresses. The knitted or woven dress is translated into a weight suited to June-like days. One stunning model, uncommonly smart, is of black silk jersey.

Maize-Colored Crepe and Self-Toned Embroidered Outfit.

like weave. The skirt, attached to an underbodice, is straight, with deep hem, and gathered slightly full at the waist. The overblouse is embroidered in a solid, all-over pattern, in white silk, which also finishes the short elbow-length sleeves with a deep cuff border.

An overblouse and a slip of pale yellow satin crepe is embroidered in white floss. A white flat crepe is heavily embroidered in jade green. A maize-colored one-piece crepe gown has the straight long-waisted bodice and sleeves embroidered in self-toned silk, and the skirt is plain to the knee, finishing in a plaited flounce.

A frock of hydrangea blue is embroidered in the same shade and one deeper, and both yellow and green in the lighter shades are popular. The combinations of black and white are popular and some are exceedingly smart.

Some very chic things are seen among the odds and ends, so to speak, of outing togs. One is the white cloth waistcoat, cut on the lines of the hostler's waistcoat worn in the heavier sports suits. It is sleeveless and severely tailored, and is worn with a white sports skirt and tailored shirt most suitably for golf and tennis.

The greatest variety is shown in sports skirts. The plain tailored or slightly gathered and the plaited skirt are equally good. White is the rage, of course, but many snappy styles are shown in plaids, checks and stripes, especially stripes that are conspicuously wide and are more modish in black and white than in colors. Roman striped materials are seen on many of the overblouses as a trimming, sometimes as a knotted tie, under a sailor collar.

Sweaters are a conspicuous feature of the sports costume, decorative and comfortable as they are for so many occasions. They are all of lightweight wool or silk, knitted loosely, or in jersey ribbed weave, and the most popular designs are of white on which a pattern is traced in colors. The wildest flights of fancy are illustrated in many styles now in vogue.

## Hats Are Unique.

Hats for the present season are engaging, and some are unique. An amusing little model is hand-crocheted of fine white wool, as a table mat would be done, but in the shape of a cloche, the scalloped edge shading the eyes. A green ribbon is tied around the crown and is knotted at one side. Many hats are shown in fine white straw, in taffeta, ribbon or other material.

Some lovely shapes are shown by a prominent milliner in wide ribbon sewn together to form the dome-shaped crown and covered entirely with tiny ribbon flowers fastened flat.

A pretty and suitable type of hat is fashioned of silk and straw combined in alternating strips, light, summery and new. Tams and the soft feather-weight felts are for beach wear and boating chiefly, and the fancy, more elaborate hats, in both the close and wide-brim models, are those worn for dressy afternoon wear.

Gloves are a negligible quantity, being worn little; but some new styles are seen in white or yellow chamois, suede and kid, some quite richly embroidered, and most of them in the Biarritz or gauntlet type.

Wraps required at resorts are in light or medium weight, simple, smart and picturesque. The long cape of military cut shown among the most exclusive Paris models is particularly popular. It is made of silk, taffeta, faille, satin or light-weight cloth. It is easily thrown over any gown, and is always smart. The sports coat in the loose-woven woolsens; in white and light colors, is indispensable, and few shown this season without a collar shape fur.

## A Mixed Scene.

They sometimes shoot "bits" in the movies. Shots of a big city parade cost nothing, for instance, and you can work them into many a plot. A director who had gone high into the mountains got to talking with a scientist who maintained a small observatory. This expert told him something which caused him to send a telegram: "Hustle up some scenery. I can catch genuine snowstorm." Some hours later a truck arrived and so did the snow. But when they set up the scenery they found it was not well chosen to match a snowstorm. All they had was an Egyptian pyramid, a section of the New York subway and an elaborate ballroom scene.

## Bright Color in Chic New Things

## Beads, Earrings and Gay Neckwear in Favor; Scotch Plaids Appear.

It is now so usual and is considered so smart to wear a string of beads, as well as earrings, brooch and other ornaments, that these appear in the smart shops in new versions almost daily. It would seem that the entire gamut had been run in the matter of stones, colors and designs, observes a fashion writer in the New York Times. In these days no woman is seen in morning, afternoon or evening dress without a necklace of some sort.

These wares are the most decorative that shopkeepers have ever had the opportunity of presenting to a smartly gowned public, and their very display helps to sell them.

At the moment amethyst matrix is a tremendous favorite, quite supplanting carnelian, amber, topaz, jade, rose quartz and crystal. Amethyst is in itself so colorful that the matrix beads, with their crackly surface, make the most lovely head strings, especially when put together with slight cut crystal.

An innovation in neckwear is plaited colored organdie, sold by the yard, of which to make collars and cuffs. There is quite a craze for these colored muslins, and white is less worn than ever before. The plaiting is picked or hemmed, and sometimes is finished with a scalloped or pointed edge. It is very chic, especially for the flat, round collars and narrow cuffs of the one-piece coat dresses.

From the Highlanders of Scotland motifs are borrowed. Historic clan plaids now appear in the frocks, millinery and many fashionable toilet accessories. Most important is the overblouse, made like the juniors' middie, a straight-cut garment from shoulder to low hip line, where it is held to the figure with a wide belt or sash. Numberless blouses in this new model are made in crepe, silk, satin lingerie, batik or embroidered.

But a chic waist is that of plaid silk, to be worn with a skirt of plain color, tailored or plaited. One most effective is of black velvet, to which the bright plaid gives a merry contrast.

The fad for gay plaid materials is seen in the jaunty turbans, parasols, bags, sash ribbons, petticoats, brassieres and the like. A very late thing in umbrellas is not the virtuous old black affair we were reared to regard as correct, but a flashy thing covered with plaid silk, Scotch or whatever, so it be gay.

## Smart Cloche Is Made Entirely of Ribbons

This snappy cloche is made entirely of ribbons. It is double-faced in American Beauty and gold trimmed with flowers to harmonize.

## Cover and Score Pad That Will Add Cheer

A thoughtful hostess knows that for good bridge morale the right kind of table cover is necessary, so she gets a square piece of black satin and borders it with inch-wide gold metallic ribbon. It is with a luxurious tassel at each corner, which gives it weight and balance. The border is put on with liquid glue, a thin line spread along each edge of the ribbon, applied a few inches at a time and allowed to "set" before the surfaces are joined. Use only the best quality liquid glue.

A score pad to match the table cover is made by covering an ordinary pad with black satin ribbon, bordered with narrow gold metallic ribbon. All of the work is done with the best quality liquid glue. Material required: Five-eighths yard of 5 1/2-inch ribbon for cover, two yards for lining and pocket insert, and two yards of one-half-inch ribbon for border.

## Three-Quarters Length Coat Is Worn in Paris

The very short and the very long coat have passed from the picture for the moment at least, and the three-quarters length coat is everywhere in evidence in Paris. Belts and other means of fastening are taboo on these models, which are wrapped closely about the figure and held in place by the wearer. They are developed from tasha, suede and suede in bright colors and are bound with black silk braid. Eyelet embroidery, an almost forgotten relic of the past, has been revived and is extensively used to ornament these coats, so necessary for the Riviera in its cooler moments.

the dress is worn a narrow belt of white leather.

This sleeveless, smart and thoroughly easy little frock is quite the rage and is being made in light twills, ribbed silk and poplins in pretty colors, with the under blouse of sheerest white, and with sunshade and shoes matching the dress in color.

Usually the hat is a small cloche shape in white with a bit of the color introduced with needlework.

## Knitted or Woven Dresses.

The knitted or woven dress is translated into a weight suited to June-like days. One stunning model, uncommonly smart, is of black silk jersey.

Maize-Colored Crepe and Self-Toned Embroidered Outfit.

like weave. The skirt, attached to an underbodice, is straight, with deep hem, and gathered slightly full at the waist. The overblouse is embroidered in a solid, all-over pattern, in white silk, which also finishes the short elbow-length sleeves with a deep cuff border.

An overblouse and a slip of pale yellow satin crepe is embroidered in white floss. A white flat crepe is heavily embroidered in jade green. A maize-colored one-piece crepe gown has the straight long-waisted bodice and sleeves embroidered in self-toned silk, and the skirt is plain to the knee, finishing in a plaited flounce.

A frock of hydrangea blue is embroidered in the same shade and one deeper, and both yellow and green in the lighter shades are popular. The combinations of black and white are popular and some are exceedingly smart.

Some very chic things are seen among the odds and ends, so to speak, of outing togs. One is the white cloth waistcoat, cut on the lines of the hostler's waistcoat worn in the heavier sports suits. It is sleeveless and severely tailored, and is worn with a white sports skirt and tailored shirt most suitably for golf and tennis.

The greatest variety is shown in sports skirts. The plain tailored or slightly gathered and the plaited skirt are equally good. White is the rage, of course, but many snappy styles are shown in plaids, checks and stripes, especially stripes that are conspicuously wide and are more modish in black and white than in colors. Roman striped materials are seen on many of the overblouses as a trimming, sometimes as a knotted tie, under a sailor collar.

Sweaters are a conspicuous feature of the sports costume, decorative and comfortable as they are for so many occasions. They are all of lightweight wool or silk, knitted loosely, or in jersey ribbed weave, and the most popular designs are of white on which a pattern is traced in colors. The wildest flights of fancy are illustrated in many styles now in vogue.

## Hats Are Unique.

Hats for the present season are engaging, and some are unique. An amusing little model is hand-crocheted of fine white wool, as a table mat would be done, but in the shape of a cloche, the scalloped edge shading the eyes. A green ribbon is tied around the crown and is knotted at one side. Many hats are shown in fine white straw, in taffeta, ribbon or other material.

Some lovely shapes are shown by a prominent milliner in wide ribbon sewn together to form the dome-shaped crown and covered entirely with tiny ribbon flowers fastened flat.

A pretty and suitable type of hat is fashioned of silk and straw combined in alternating strips, light, summery and new. Tams and the soft feather-weight felts are for beach wear and boating chiefly, and the fancy, more elaborate hats, in both the close and wide-brim models, are those worn for dressy afternoon wear.

Gloves are a negligible quantity, being worn little; but some new styles are seen in white or yellow chamois, suede and kid, some quite richly embroidered, and most of them in the Biarritz or gauntlet type.

Wraps required at resorts are in light or medium weight, simple, smart and picturesque. The long cape of military cut shown among the most exclusive Paris models is particularly popular. It is made of silk, taffeta, faille, satin or light-weight cloth. It is easily thrown over any gown, and is always smart. The sports coat in the loose-woven woollens; in white and light colors, is indispensable, and few are shown this season without a collar shaver fur.

## A Mixed Scene.

They sometimes shoot "bits" in the movies. Shots of a big city parade cost nothing, for instance, and you can work them into many a plot. A director who had gone high into the mountains got to talking with a scientist who maintained a small observatory. This expert told him something which caused him to send a telegram: "Hustle up some scenery. I can catch genuine snowstorm." Some hours later a truck arrived and so did the snow. But when they set up the scenery they found it was not well chosen to match a snowstorm. All they had was an Egyptian pyramid, a section of the New York subway and an elaborate ballroom scene.

**Queer Villages**

Tucked away in odd corners of Great Britain are some villages with peculiar names. In Kent we find Painter's Forest, Dripping Gore, and Old Wives Lees. The last place derived its strange name from the fact that old women of the district used to run an annual race there for prizes offered by the local lord of the manor. Dripping Gore was so called because the Danes and Saxons are believed to have fought a battle at this spot.

**Taking Them in Order**

The elevator boy was green at the job. Two passengers, a man and a woman, got on at the street floor. "Ninth," said the latter once they were fairly started. "Sixth," said the man. The car sped by the sixth floor and stopped at the ninth. On the way back the man said: "Why in thunder didn't you stop at the sixth floor? The sixth is lower than the ninth." "I know that," said the elevator boy, "but the lady said 'Ninth' first."

CREAM TO SELL

The minute you start using a De Laval you get something to sell for cash—cream; and in addition you get skim-milk to grow into another crop of calves, pigs and chickens. Two sources of profit, and a steady cash income every day.

This is the surest, safest and most profitable way of farming—and the De Laval Separator makes it possible. It is the original separator, skims cleaner, lasts longer, turns easier than any other. There are over 2,500,000 De Laval Separators in use the world over—about as many as all the rest put together. The De Laval has always led in every important separator improvement.

**Enormous Losses in Hatching Eggs**

Poultrymen Urged to Have Breeders in Excellent Health.

(Prepared by the United States Department of Agriculture.) A good criterion of one's ability as a poultry raiser, the Department of Agriculture says, is the number of chickens raised to maturity in proportion to the eggs set. Success depends to a large extent on this one factor.

**Causes for Losses.**

The causes for enormous losses in eggs and dead embryos occurring annually in the country are many. A conservative estimate places the loss due to eggs that did not hatch in 1923 at over \$8,000,000. Be sure, department poultrymen advise, that your breeders are in excellent health, have sanitary quarters, and that one male is mated to not over 15 females. Other losses

Colony Houses Encourage Health of Fowls.

are due to the fact that many poor eggs are set. Test your eggs carefully, and take out all with thin and spotted shells or those with cracked shells. Make sure that all eggs set are also of standard size.

The greatest loss in incubation occurs in the embryos that die in the shell. This may be due to faulty methods of incubation or to eggs of poor hatching quality. Immature pullets, breeding stock that has been sickly and birds that have been forced heavily for winter production are apt to produce eggs that will not hatch well.

**Use Healthy Breeders.**

All breeders used should be thoroughly healthy; they should have abundance of constitutional vigor; and they should receive good breeding rations. The department advises against the use of too much protein, probably not over 15 per cent, in the mash rations; plenty of green food should be provided. Furthermore, give the breeders as much exercise as possible. In fact, do everything possible to insure the production of eggs of good hatching quality and many apparent troubles in incubation will be solved.

**Cornstarch Industry in America Is Enormous**

The manufacture of cornstarch has grown to such proportions in this country that the industry now consumes about 50,000,000 bushels of America's great crop each year, according to the Department of Agriculture at Washington. From each bushel of corn the average manufacturer makes thirty-three pounds of cornstarch, and in 1921 the ten largest concerns made nearly 1,850,000,000 pounds of this product, which was more than 90 per cent of the total produced that year.

This industry, which began in the United States in 1844, has been growing rapidly in recent years. By 1880 the factories had reached a productive capacity of 230,000,000 pounds, and practically all of it was consumed here. By 1921 there were nearly 50 plants, and \$6,000,000 worth of the output was exported. These figures are from a report recently made public by the department following a canvass of the industry.

"This department, through the bureau of chemistry, which enforces the food and drugs act, finds that cornstarch, with the possible exception of granulated sugar, is the least adulterated of all food products appearing on the markets," continues the department. "In addition to being used for food, it is also used for many technical purposes.

"In the food industry cornstarch finds its greatest use as a basis for the manufacture of corn syrup or glucose, about one-half of that produced in 1921 having been used for that purpose. It is employed by confectioners in making gumdrops; by housewives and chefs in thickening sauces and making custards. Confectioners also use it for forms into which soft candy is poured in making bonbons. Large quantities are used in the manufacture of baking powder and pie fillers. It is also an important ingredient in cosmetics and pastes, and is used to a limited extent in pharmaceutical preparations."

**Composer of "The Rosary"**

Ethelbert Nevin composed "The Rosary." He was born in Vineacre, near Pittsburgh, Pa., in 1862. He began to attract attention when ten years old by his excellent piano playing and when he was twelve he was sent to Dresden, Germany, to study.

After returning from Germany he settled in Boston and became a well-known teacher and concert player, but in 1893 the charm of Europe, especially Italy, was too strong to be resisted, and the next seven years were spent abroad, says the Detroit News. The influence of southern Europe is very evident in the dreamy, romantic tone of much of his later music. In 1900 he became a music instructor at Yale university and was in this work when stricken with heart failure. He died in 1901.

Few modern composers have excelled Nevin in perfection of melody, critics say. While "The Rosary" is his masterpiece, "Narcissus" has received no small amount of popularity. Other compositions by Nevin are "Water Sketches," "Day in Venice" and "Twins April."

Read The Union Herald—10c a week

**Oldest Jewish Church in U. S.**

Touro park, in Newport, R. I., was named for Judah Touro, an eccentric, heart-hearted Jew, who left the town \$10,000 for its purchase in 1854. Near by is a little Jewish cemetery, which is one of the ornaments of the city and not far away, in Touro street, one is brought to the synagogue of the oldest Jewish congregation in America, says the Detroit News. The congregation of Salvation of Israel was organized in 1650. The synagogue was built in 1703. One of the scrolls of the law deposited in the synagogue, and now more than 400 years old, was brought from Europe by the Jews who reached Rhode Island in 1658. When the British troops occupied Newport, the Jewish supporters of the American cause, were forced to flee. The synagogue was closed and for almost a century it was deserted.

**Philanthropy Misapplied.**

"Now, that is one of the most pathetic things I have ever seen," said the rich and benevolent old man, who, on a scorching hot day, stood with a friend, watching a typical street Arab. "You see the ice cart has been delivering at that shop, and the poor little chap has taken a piece from the gutter. Now, you and I, who can get refreshing drink whenever we require it, cannot imagine what a luxury that piece of ice is to that boy. Here, my little fellow, here's a dime. Get yourself a glass of lemonade. You must not eat that stuff. It would make you ill." "I wasn't going to eat it," said the grimy little chap. "Faver's having a sleep at home, an' I was goin' to drop it down his back!"

**College Gets Rare Manuscript.**

"The Beehive," a monumental manuscript written by Francis Daniel Pastorius, founder of Germantown, has been loaned to the University of Pennsylvania by his descendants," says the Philadelphia North American. "The book, which consists of about 1,000 closely-written pages, was written, according to Pastorius, as a legacy to his son and to rest his mind of many facts that are in it. It was never printed. The volume is written in several different languages, including Latin, Greek, German and English. It contains much dry humor mixed with philosophy."

**Hog Slaughter for 1923 Breaks Previous Record**

More than 10,000,000 more hogs were slaughtered under federal meat inspection during the calendar year, 1923, than during any previous year, according to figures just made public by the bureau of animal industry, United States Department of Agriculture. The number slaughtered during the year was 53,333,708. The best previous record for a calendar year was made in 1922. During that year 43,113,629 hogs were slaughtered.

During December, 1923, not only the best record for the month of December, but for any month, was broken. During that month 5,003,759 hogs were slaughtered under federal meat inspection. The best previous record for a month of December was made in 1918 during which month 5,031,890 hogs were slaughtered. The best previous record for any month was made in January, 1919, during which month 5,845,696 hogs were slaughtered.

**Dwarf Trees Are Useful Where Space Is Limited**

The practice of using dwarf instead of the ordinary standard trees is more or less prevalent among prospective planters of small areas. Dwarf trees are produced by propagating them on certain stocks of roots which because of their inherently restricted habit of growth restrict also the size of the tops that have been grafted or added on them.

While earliness of bearing, and exceptionally high quality of the product are often claimed for dwarf trees, some of the best experience in this country has failed to substantiate the latter claim. Dwarf apple and pear trees have their place, however, in the garden or yard, especially under intensive methods of culture, where the space is too small to admit readily of the development of standard trees.

**Common Grains for Hay**

Any of the common grains, such as wheat, oats, barley, make good hay if cut at the proper stage of development, which is at the period of blossoming. That is when the plant contains the largest per cent of digestible nutrients. It is not common to use these plants for hay in this country. Most people seem to think they can get more out of them by allowing them to ripen, saving the grain and feeding the straw.

By 1921 there were nearly 50 plants, and \$6,000,000 worth of the output was exported. These figures are from a report recently made public by the department following a canvass of the industry.

"This department, through the bureau of chemistry, which enforces the food and drugs act, finds that cornstarch, with the possible exception of granulated sugar, is the least adulterated of all food products appearing on the markets," continues the department. "In addition to being used for food, it is also used for many technical purposes."

"In the food industry cornstarch finds its greatest use as a basis for the manufacture of corn syrup or glucose, about one-half of that produced in 1921 having been used for that purpose. It is employed by confectioners in making gumdrops; by housewives and chefs in thickening sauces and making custards. Confectioners also use it for forms into which soft candy is poured in making bonbons. Large quantities are used in the manufacture of baking powder and pie fillers. It is also an important ingredient in cosmetics and pastes, and is used to a limited extent in pharmaceutical preparations."

### Composer of "The Rosary"

Ethelbert Nevin composed "The Rosary." He was born in Vincennes, near Pittsburgh, Pa., in 1862. He began to attract attention when ten years old by his excellent piano playing and when he was twelve he was sent to Dresden, Germany, to study.

After returning from Germany he settled in Boston and became a well-known teacher and concert player, but in 1893 the charm of Europe, especially Italy, was too strong to be resisted, and the next seven years were spent abroad, says the Detroit News. The influence of southern Europe is very evident in the dreamy, romantic tone of much of his later music. In 1900 he became a music instructor at Yale university and was in this work when stricken with heart failure. He died in 1901.

Few modern composers have excelled Nevin in perfection of melody, critics say. While "The Rosary" is his masterpiece, "Narcissus" has received no small amount of popularity. Other compositions by Nevin are "Water Sketches," "Day in Venice" and "Twas April."

### Oldest Jewish Church in U. S.

Touro park, in Newport, R. I., was named for Judah Touro, an eccentric, great-hearted Jew, who left the town \$10,000 for its purchase in 1854. Near by is a little Jewish cemetery, which is one of the ornaments of the city and not far away, in Touro street, one is brought to the synagogue of the oldest Jewish congregation in America, says the Detroit News. The congregation of Salvation of Israel was organized in 1650. The synagogue was built in 1763. One of the scrolls of the law deposited in the synagogue, and now more than 400 years old, was brought from Europe by the Jews who reached Rhode Island in 1658. When the British troops occupied Newport, the Jews, ardent supporters of the American cause, were forced to flee. The synagogue was closed and for almost a century it was deserted.

### Philanthropy Misapplied.

"Now, that is one of the most pathetic things I have ever seen," said the rich and benevolent old man, who, on a scorching hot day, stood with a friend, watching a typical street Arab. "You see the ice cart has been delivering at that shop, and the poor little chap has taken a piece from the gutter. Now, you and I, who can get refreshing drink whenever we require it, cannot imagine what a luxury that piece of ice is to that boy. Here, my little fellow, here's a dime. Get yourself a glass of lemonade. You must not eat that stuff. It would make you ill." "I wasn't going to eat it," said the grimy little chap. "Faver's having a sleep at home, an 'I was goin' to drop it down his back!'"

### College Gets Rare Manuscript.

"The Beehive," a monumental manuscript written by Francis Daniel Pastorius, founder of Germantown, has been loaned to the University of Pennsylvania by his descendants," says the Philadelphia North American. "The book, which consists of about 1,000 closely-written pages, was written, according to Pastorius, as a legacy to his son and to rest his mind of many facts that are in it. It was never printed. The volume is written in several different languages, including Latin, Greek, German and English. It contains much dry humor mixed with philosophy."

### Oatmeal to Clean Lace

Fine oatmeal will clean lace that is not too badly soiled.

### 16 TO 1.

We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscription to either Daily or Weekly Union-Herald.

### STRAWBERRY SOCIAL

Will be given at Jackson school building, Thursday evening, June 26, by Jackson Grange. Everybody welcome. 23juned2w1.

## Two Streams of Profit

Cash Income every day

Bank Account

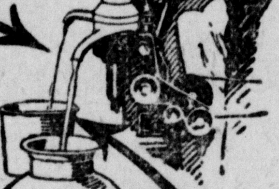

Buying Power

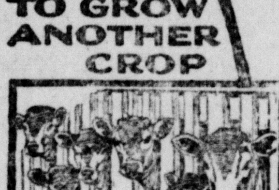

Let us tell you how you can make more from your cows.

The minute you start using a De Laval you get something to sell for cash—cream; and in addition you get skim-milk to grow into another crop of calves, pigs and chickens. Two sources of profit, and a steady cash income every day.

This is the surest, safest and most profitable way of farming—and the De Laval Separator makes it possible. It is the original separator, skims cleaner, lasts longer, turns easier than any other. There are over 2,500,000 De Laval Separators in use the world over—about as many as all the rest put together. The De Laval has always led in every important separator improvement.

## HENN BROS. MEAT MARKET

Yes, we have a Jim Vaughan machine. On this we cut our meat, fat or lean. We cut steaks, roasts, or chops, it can be seen. No splinters or slivers which you usually get. We cut it by machine you bet.

We cut it nice and even. It can hardly be believ'in'. But this machine just cuts it through. Just come and see what it will do. We cut our meats real nice for you.

## Hog Slaughter for 1923 Breaks Previous Record

More than 10,000,000 more hogs were slaughtered under federal meat inspection during the calendar year, 1923, than during any previous year, according to figures just made public by the bureau of animal industry, United States Department of Agriculture. The number slaughtered during the year was 53,333,708. The best previous record for a calendar year was made in 1922. During that year 43,113,629 hogs were slaughtered.

During December, 1923, not only the best record for the month of December, but for any month, was broken. During that month 5,903,759 hogs were slaughtered under federal meat inspection. The best previous record for a month of December was made in 1918 during which month 5,031,890 hogs were slaughtered. The best previous record for any month was made in January, 1919, during which month 5,845,696 hogs were slaughtered.

## Dwarf Trees Are Useful Where Space Is Limited

The practice of using dwarf instead of the ordinary standard trees is more or less prevalent among prospective planters of small areas. Dwarf trees are produced by propagating them on certain stocks of roots which because of their inherently restricted habit of growth restrict also the size of the tops that have been grafted or added on them.

While earliness of bearing, and exceptionally high quality of the product are often claimed for dwarf trees, one of the best experience in this country has failed to substantiate the latter claim. Dwarf apple and pear trees have their place, however, in the garden or yard, especially under intensive methods of culture, where the space is too small to admit readily of the development of standard trees.

## Common Grains for Hay

Any of the common grains, such as wheat, oats, barley, make good hay cut at the proper stage of development, which is at the period of blossoming. That is when the plant contains the largest per cent of digestible nutrients. It is not common to use these plants for hay in this country. Most people seem to think they can get more out of them by allowing them to ripen, saving the grain and feeding the straw.

## VACUUM SYSTEM NOT UNDERSTOOD

Internal Repairs to Various Parts Are Necessary for Best Results.

(By ERWIN GREER, President Greer College of Automotive Engineering, Chicago.)  
One of the modern and least understood parts of the car is the vacuum system. The average owner knows nothing about its interior or how it works.

The pipe running down the left of the tank goes direct to the intake manifold (when the vacuum tank is attached to the dash), the pipe to the right directly to the main tank. This draws the gasoline from the main tank, usually situated at the rear of the car, to the vacuum tank. The pipe at the bottom of the tank feeds the gasoline to the carburetor.

Repair Often Needed.

Internal repairs to the various parts of the vacuum tank are now often necessary. When the tank is suspected of causing any trouble, the fuel must be drawn from it. If more than one-sixth of a quart comes out, the tank is performing its functions properly.

If the engine is run at low speed with the throttle open for a long time, the vacuum may be reduced so fast that the tank will empty itself. This condition may be produced by foreign matter choking the feed tube, from the main to the vacuum tank. Running the engine with closed throttle for a few minutes will give suction enough to fill the tank.

In case the float valve sticks, causing an overflow of gasoline from the tank, the inner shell can be removed by taking out eight screws in the top. The tank may be filled with fuel and used as an ordinary gravity system, so that the driver can get to the nearest garage.

If the vacuum tank ever becomes empty, it may be filled by closing the throttle and turning the engine over a few times. If the tank has been empty for some time and refuses to fill easily, there is probably some dirt or grit under the flapper valve. In this case squirt a little gasoline into the tank through the plug in its top, which is easily removed.

Flush Tank Often.

To save yourself possible trouble with the vacuum tank through neglect it is a good plan to remove the plug at the top and flush it out about once every three months, at the same time drawing off any sediment or water that may have collected at the bottom of the tank by opening the petcock at the bottom.

Even then the vacuum tank will sometimes fail to work properly, and if the tank should happen to refuse to function there is still a way to get home, even though you cannot find the trouble. Remove the entire top of the vacuum tank, buy a can of gasoline and use it to fill the vacuum tank. Then run the car on this supply. When it is exhausted refill it again, and so on.

Repairs Responsible for Additions to Scrap Heap

Amateur tire patching ruins thousands of automobile tires each year. It is a common practice among automobile owners when receiving a cut or puncture in a tire to insert a patch on the inside of the casing at the point of injury, thinking that the damage is permanently repaired. Such a repair will in time ruin any tire, says one expert.

It is good practice to apply patches in such cases, but a tire sleeve should be placed on the outside of the tire opposite the patched portion at the same time. The sleeve serves to bind the tire, hold the torn and injured parts of the fabric in place and prevent further chafing and rupture.

The tire sleeve and patch are merely "first-aid" appliances, and should be removed at the earliest possible moment. It will pay motorists to drive to the nearest repair man immediately after the injury occurs. If allowed to run without repair, every time the wheel makes a revolution the tire quickens its pace toward a scrap heap.

## Accidents Cost U. S.

\$2,250,000,000 a Year

Accidents cost Americans \$2,250,000,000 a year. Nine out of every ten could be prevented by carefulness.

More than 500,000 motor accidents occurred in 1923.

Every 108 minutes some one is killed in an auto smash-up.

Fifty-four auto smash-ups every hour in a 24-hour day.

Seventy-five per cent of them happen at a speed of under 15 miles.

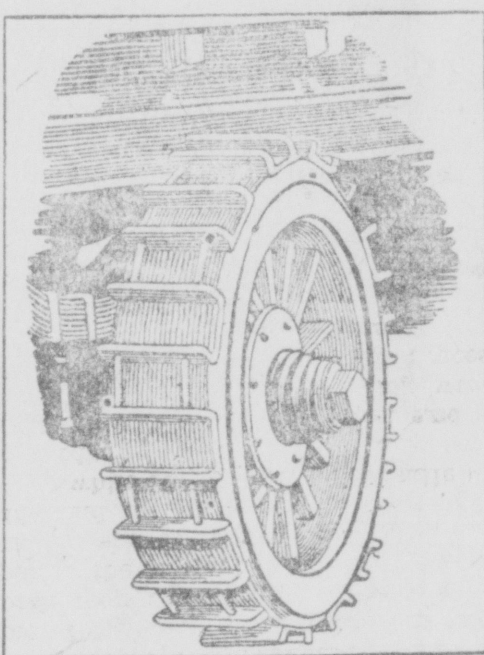

The average car running 15 miles and with brakes in perfect order cannot be stopped short of 20 feet.

Out of 10,550 deaths due to smash-ups in New York state 700 were due to reckless driving, 850 to defective mechanism, 9,000 to careless pedestrians.

Won't you be careful in driving your car? Let's give a thought to the careless pedestrians and children that meet death every year in accidents.

## Grousters Assist Trucks in Soft or Muddy Field

Frequently a motor truck may be used in an emergency to do some sort of field work. One Oregon rancher, who had occasion to do some hauling from a soft field, equipped his rear wheels with removable "grousters" similar to those used on tractors, but

Grousters Attached.

made especially for the truck wheels. They consisted of pieces of angleiron, cut the correct length, and bolted together, so that when applied there was no slippage of the wheels inside the grousters. The accompanying sketch gives a good idea of the arrangement.

## Greasing of Rear Axle Can Be Done Very Quick

Here is a method of putting lubricant into the rear axle in double quick time: Put a common funnel in the filler hole of the axle. Remove the cap and nozzle from the end of the grease gun, opening the whole front end of the gun. Put the end of the grease gun in the wide end of the funnel and hold it firmly while screwing up the handle in the ordinary way. The grease will shoot into the axle in jig time, and a rinsing with kerosene and wiping with a bit of waste will remove all traces of the operation from the funnel.

## Automobile Notes

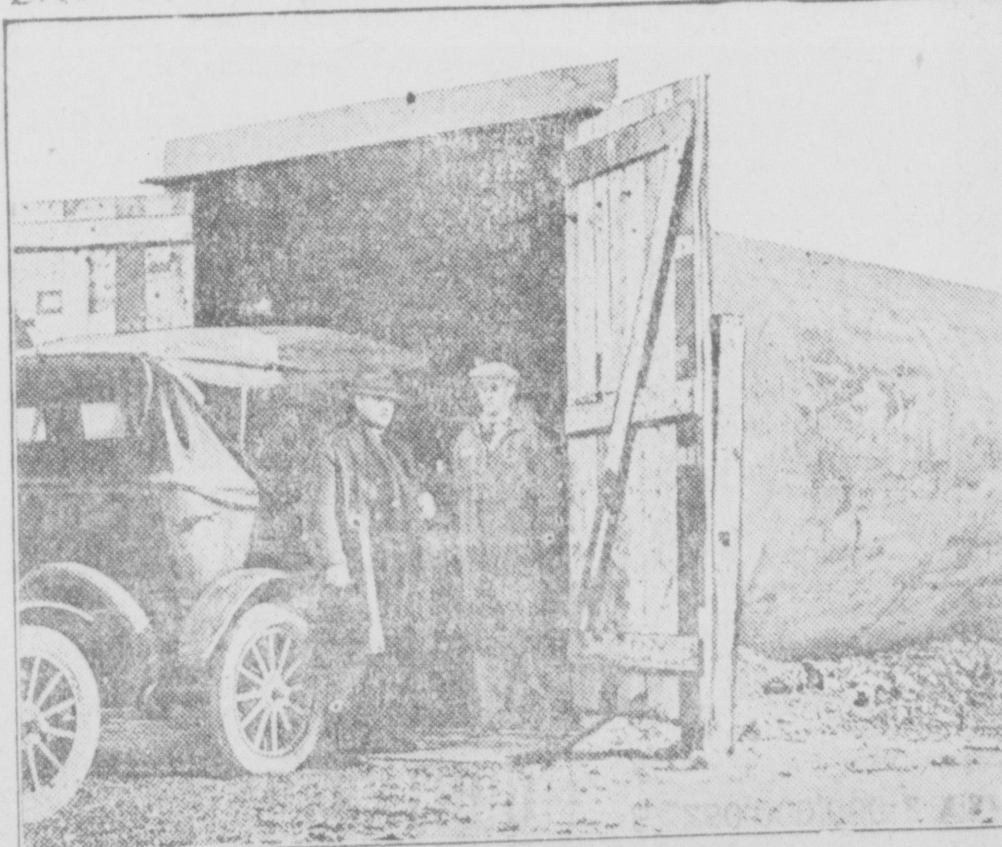

Loose battery terminals may be tightened by using a thin sheet of tin-foil.

One never appreciates how grand it is to drive slowly until one has hit it up once too often.

Brass polish should never be used on nickel trimmings, as abrasive particles in the polish scratch the plating.

No motor vehicle should be parked at the entrances to hotel, theaters, office buildings, large stores and other buildings to which there is a great amount of coming and going.

## BATTLESHIP FUNNEL MAKES IDEAL GARAGE

W. B. Fortune of Philadelphia, Pa., while wandering about the navy yard there, trying to figure some way to build a garage for his two cars, spied a dismembered funnel of the scrapped U. S. S. Maine, and a few minutes later he was at work on his new garage, which now holds his two cars comfortably.
